The results presented in the paper entitled "The Long-Term Effect of Military Conscription on Personality and Beliefs" can be replicated using the following files:

Program Files (All files ending in .do should be executed in Stata (version 15.0 or higher))

1. Econometric Analysis.do – this do file estimates the results presented in all the tables and figures with the exception of the tables and figures presented in the Online Appendix.
2. Online Appendix.do – this do file reproduces the tables and figures presented in the Online Appendix.

Data Files

1. Military dataset.dta - this dta file contains all the variables used in the analysis, with the exception of the variables used for Figure A1 presented in the Online Appendix.
2. fathereduc.dta and mothereduc.dta - these dta files contain the variables used to reproduce Figure A1 presented in the Online Appendix.

Here is a list of the variables used in the analysis:
