****
FOLDERS:

A. These materials contain two folders

1. Code : includes Stata do files (see below)

2. Data : includes data files (see below)

B. The code will also generate a folder in the main working directory

1. paper_output will store the tables and figures for the main body of the paper and the supplemental information

** Please ensure this folder is deleted before running the code

****
****
DATA:

A. The Data folder contains 4 data files.

1. 2012 survey data.dta : panel data collected by one of the authors (Horowitz) prior to Kenya’s 2013 election

2. 2015 survey data.dta : main survey data collected in Kenya in 2015 by the authors

3. 2016 survey data.dta: a replication survey conducted in Kenya in 2016 by the authors

4. urb_rur_data.dta : data from six national surveys conducted in Kenya by

Steadman (no Ipsos) prior to Kenya's 2007 election

****
****
CODE:

A. The Code folder contains one Stata do file.

1. replication do file : contains all code needed to replicate the tables and figures in the main text and the supplemental information
