pastors_pinochet_replication.R: Replication script

To replicate

Download the Chile 2012 AmericasBarometer survey (Stata version) from http://www.vanderbilt.edu/lapop/free-access.php and save it in the same directory as the files above. This file is necessary to reproduce one of the Appendix tables but could not be included here because the user license does not permit redistribution. If the filename differs from "420502678Chile LAPOP AmericasBarometer 2012 Rev1_W.dta" you will need to modify the relevant code in pastors_pinochet_replication.R.

Open R and run pastors_pinochet_replication.R (you must have the packages "Matching", "Hmisc", "car", and "foreign" installed).

Running the script will write .pdf files of all figures, and .tex files for all tables, to the working directory. The .tex files for the tables need to be inserted into a LaTeX document and compiled.
