Enclosed are the following files:

1. **cis3236_stata.dta**
   Main dataset from the CIS (study number: 3236) in STATA (.dta) format. Data is available in SPSS format via:
   http://www.cis.es/cis/opencms/ES/2_bancodatos/catalogoencuestas.html
2. **codebook.pdf**
   Description of original data codes provided by the CIS
3. **vox_dofile.do**
   STATA dofile including main syntax for analysis
4. **analysis_output.smlc**
   Log file with STATA output
5. **robustness.do**
   STATA dofile including syntax for robustness checks in appendix

Replication description using main STATA dofile:

1. Code lines 10-145 clean up the data and generate the appropriate variables used in the analysis
2. Code lines 148-172 estimate the main multinomial logit model and the average marginal effects of the variables.
3. Code lines 175-181 test the conditional effect of immigration on income
4. Code lines 184-188 estimate a logit model predicting support for Vox amongst right-wing voters from the 2016 general elections and the marginal effects.
