Reproduction files for "How Does Treatment Self-Selection Affect Inferences About Political Communication?"

Thomas J. Leeper

August 9, 2016

This document describes the files needed to reproduce the results reported in:

> Leeper, Thomas J. "How Does Treatment Self-Selection Affect Inferences About Political Communication?" *Journal of Experimental Political Science*: In press.

The reproduction files are as follows:

1. `analysis.R`: the main R analysis file used to produce the results reported in the paper
2. `functions.R`: an R script file containing various functions used in `analysis.R`
3. `HybridAttImpData.dta`: the raw data file used by `analysis.R`, in Stata (.dta) format
4. `survey.doc`: a Word document (.doc) containing the complete survey experimental questionnaire used in the study. The experiment was embedded as part of a larger survey and this document contains the full contents of the questionnaire.
