Data files

The online data archive contains the following data sets in Stata 15 format:

- *county_level.dta* provides data for the county-level analysis of the paper. Together with the dofile *county-level.do*, they allow to replicate the following tables:
    - Table 2 and Table 6 in the main text.
    - Table A1, Tables B1-B8, and Tables C1-C4 in the appendix.
- *individual_level.dta* provides data for the individual-level analysis of the paper. Together with the dofile *individual_level.do*, they allow to replicate the following tables:
    - Table 3, Table 4, and Table 7 in the main text.
    - Table A2, Tables B9-B14, and Tables C5-C8 in the appendix.
- *anes_dataset dta* provides data for the analysis of the paper using the ANES data. Together with the dofile *anes_level.do*, they allow to replicate the following tables:
    - Table 5 in the main text.
    - Table B15 in the appendix.

Moreover, the data archive contains the excel file Table 1, which include the data used in Table 1. Data can be downloaded at:

https://qwiexplorer.ces.census.gov/static/explore.html#x=0&g=0

Note that for replicating the results in Stata, the following commands have to be installed: ivreg2, ivreghdfe, outreg2, reghdfe, and xtivreg2.
