Page exit logic: Skip / Disqualify **LogicIF:** (#5 Question "I have read and understood the informed consent form?" is one of the following answers ("No") OR #6 Question "I agree to participate in this study?" is one of the following answers ("No")) **THEN:** Jump to Pardon

Before you begin:

Study information
- We are asking you to participate in a research study because of your interaction with C4C. The purpose of this research is to understand the types of people who use the C4C tool and the reasons for their use. We also want to know what men and women think about this tool. - You must be aged between 18 and 49 to take part.
Your role in the research
- If you agree to take part in the study after reading this consent, you will automatically be directed to

an online survey based on your gender. The survey includes questions about yourself (such as your age, education level and marital status) to find out about the types of people who use the tool. We'll also ask you about your experience with the tool and your opinion of it. Finally, we'll ask you a few questions about family planning and contraception. It will take about 30 minutes to complete the survey.

Possible risks
- We believe that the risks for people taking part in this survey are low. Some of the survey questions may make you feel uncomfortable. You don't have to answer any questions you don't want to.

Possible benefits
- You will not receive any benefits from participating in this survey. The information you provide will help us improve the C4C tool, which can help people like you obtain important information about family planning.

Voluntary participation
- You are free to decide if you want to participate in this research. You don't have to answer any questions you don't want to. You can stop the survey at any time. -
If you agree to take part and then change your mind, you can stop at any time. - Your decision to participate in this study will not affect your ability to receive health services.
Confidentiality
We will
not collect any information that could link you to your survey responses. For example, we will not ask for your name or telephone number. We will protect the information you provide and your participation in this research to the best of our ability. We will only share your responses with others after we have ensured that we have no personally identifiable information about you.
Compensation
- If you choose to participate in this survey, you can receive 2000 CFA in communication credit. If you wish to receive communication credit, you must provide your cell phone number so that we can send it to you. Your telephone number will not be associated with your survey responses.
If you have any questions
This research has been reviewed and approved by the FHI 360 ethics committee and the Comité National d'Ethique des Sciences de la Vie et de la Santé (CNESVS) of Côte d'Ivoire.
If you have any questions about the research, you can call Dr Denise Kpebo, the principal investigator, on [contact info removed] from 8am to 6pm.
If you have any questions or concerns about your rights as a research participant, please contact Dr Louis Penali, Comité National d'Ethique pour les Sciences de la Vie et de la Santé, on [contact info removed].
