Data and Replication Information

- Syntax file.do: Stata code to create the dataset and replicate all Tables and Figures in "Rents, Refugees, and the Populist Radical Right" by Alexander Held and Pauliina Patana. The data that is needed for this replication (SOEP-Core, 1984-2019, version 36, International Edition, https://doi.org/10.5684/soep.core.v36i) can be accessed after signing an agreement with the German Institute for Economic Research (DIW Berlin). For details on data access, please see https://www.diw.de/en/diw_01.c.601584.en/data_access.html. For details on the data, see Goebel et al. (2019). The replication of:
    - Model 4 in Table 1 in the article
    - Model 4 in Tables 6, 7, 8 and 9 in the Appendix and
    - Table 10 in the Appendix

  requires access to a more restricted version of the data (SOEP-Core, 1984-2019, version 36, EU Edition, https://doi.org/10.5684/soep.core.v36eu), which can be obtained from the German Institute for Economic Research (DIW Berlin). This article used the statistical software Stata 14. The Stata syntax uses the graphic scheme from the (optional) gr0070 package from Bischof (2017). For details, see Bischof (2017) and the Stata syntax.
