Explanatory note for "Are Electoral Autocracies Better for the Poor? Evidence from Social Assistance Programs" (forthcoming in *Research & Politics*)

All analyses reported in the manuscript and supplemental materials were performed in Stata (version 14). The replication sytax file requires installation of two packages: 'coefplot' by Ben Jann, and 'blindschemes' by Dan Bischof.

The replication dataset is titled "RepData_Revisions_June2020.dta"

The replication syntax/code is titled "Published Version Replication Code.do"

A complete log file of a successful run of the code is included in Stata .smcl format, titled "R&R_log."
