Combined Application Projects

Section 17(b)(1)(A)

Combined Application Projects (CAPs) are SNAP demonstration projects that involve collaboration among the Social Security Administration (SSA), FNS, and State and local agencies to streamline application procedures for individuals receiving SSI benefits. CAPs are available in two models: standard and modified. The standard model includes simplified joint SNAP/SSI application processing by SSA as individuals apply for or are recertified for SSI. The modified model uses data from SSA to send eligible SSI households simplified SNAP applications. Both models use standard SNAP benefit amounts and/or shelter expenses in the benefit calculation. All demonstration projects are required to be evaluated.
