Fatal Injury Trends

Export Data

Injuries are one of the leading causes of death in the United States. The chart below shows the number of all unintentional fatal injuries and select fatal injury types (for example, falls, drowning, suicide) by month and year, including provisional data. Visit CDC's Web-based Injury Statistics Query and Reporting System (WISQARS™) to find additional injury data.

Provisional and Final Fatal Injury Data by Month, United States

Select Injury Type: All Unintentional Injuries

Footnotes

All unintentional injury death ICD-10 codes: V00-X59 and Y85-Y86

Provisional data are based on death certificate data received, but not yet fully reviewed, by CDC"s National Center for Health Statistics (NCHS). Provisional data provide an early estimate of deaths before the release of final data. Complete documentation may be found at https://wonder.cdc.gov/mcd-icd10-provisional.html.

Produced by National Center for Injury Prevention and Control with Provisional Deaths from CDC WONDER Online Database using Multiple Cause of Death from NCHS.
