Friendly fire? Negative campaigning among coalition partners

Replication materials

This documents provides information for replicating the results presented in the paper and its online appendix. The script files contain more details on commands and analyses for replicating descriptive and multivariate results.

File list:

| File name | Type | Purpose |
|---|---|---|
| friendlyfire_replication.dta | Stata dataset | Replication dataset |
| friendlyfire_replication_agg.dta | Stata dataset | Replication dataset for direct replication of Figure 1 (created in the Stata do-File) |
| friendlyfire_replication.do | Stata do-File | All commands necessary for carrying out analyses and robustness tests described in the paper and its online appendix (using the Stata data file). The file also contains information on how to replicate particular tables and figures. |
| friendlyfire_replication.R | R-script | Script for replicating Figure 1 (uses the Stata dataset). The script installs and loads all required packages for creating the figure. Running the code will produce the graph. |
