Readme File
June 16, 2023

In the root directory, “Mapping.20230616” has a description of the do files used to create each table and figure, as well as the name of the associated log or other output.

In the root directory, “Description of Data Files.20230616” has a description of all dta files used in the analysis.

There are five Stata do files (in txt format) in the “replication files PD” folder:

- CompleteCodebase
- fin_addition
- finfigA5A11
- finreg_quantgov_stsi
- social-return

There are the five associated log files in “replication files PD/log”.

There are the dta files needed for the regressions in “replication files PD/dta files PD”.

The folder “replication files PD/charts and pieced-together tables” has charts and tables assembled from raw data, Stata output, and the like.
