NATIONAL COUNCIL ON
CLIMATE CHANGE

Jakarta, 19 January 2010

Our Ref. : E-01/EC-NCCC/01/2010
Attachment : -
Subject : **Indonesia's Plan to Reduce GHG Emission**

To,
Yvo de Boer
Executive Secretary of the UNFCCC
Bonn, Germany

Dear Yvo,

Greetings from Indonesia!

From the outset, I would like to underline Indonesia's support on the global effort to reduce the GHG concentration in the atmosphere. Please be reaffirmed that the Government of Indonesia fully endorses the Copenhagen Accord, particularly in bringing all parties together to increase efforts toward stabilization of global temperature to a level that does not exceed two degree Celsius in the near future.

We are now finalizing the National Action Plan to materialize 26 to 41 percent CO_2 equivalent emission reduction in the country. To place this plan in power, a Presidential Decree as the basis of the National Action Plan is envisaged. Based on our analysis, to achieve the 2020 emission reduction cut as mentioned above, there are seven major areas to focus on, namely: peat-land, forestry, agriculture, energy, industry, transportation, and waste. In addition, the Action Plan will be equipped with an MRV system to ensure that each action deserves compensation.

The Indonesia National Council on Climate Change will update the UNFCCC Secretariat on the progress. I am sure, with your continued support and guidance; we will arrive at a fruitful solution in tackling global problem of climate change.

Yours sincerely,

Rachmat Witoelar
Executive Chair
National Council on Climate Change

Cc.
1. President of Indonesia, as Chairman of the National Council on Climate Change (NCCC);
2. Coordinating Minister of Economy, as First Vice Chairman of NCCC;
3. Coordinating Minister of Social Affairs, as Second Vice Chairman of NCCC.
