CANVAS

1. **CHARACTERISTICS OF THE STUDY POPULATION:**

- **Medical record:**
- **Age :**
- **Family History :**

    - Gastric cancer ☐
    - Colorectal cancer ☐
    - Cancer of the uterus cervix ☐
    - Endometrial cancer☐
    - Ovarian cancer ☐
    - Breast cancer☐
    - Others ☐

    Specify : ……

- **Personal History:**
    - ✓ **Habits :**
        - Tobacco ☐
        - others ☐: …….
    - ✓ **Medical history :**
        - Diabetes ☐
        - Hypertension ☐
        - Obesity ☐(BMI = ……)

- Dysthyroid ☐
- PCOS ☐
- Other ☐ : ……

✓ **<u>Surgical history</u>:**

- Gastrectomy☐
- Colectomy ☐
- Appendicectomy ☐
- Cholecystectomy☐
- Other ☐: ……

✓ **<u>Gynaecological history</u>:**

- Gravidity: …..
- Parity: ……
- Menarche : .....
- Contraception: No ☐Oral contraceptive use ☐Intrauterine device☐ progestin ☐ tubal ligation ☐
- Hormonal replacement therapy: ☐
- Infertility: No ☐Primary ☐Secondary ☐
- Pap smear: No ☐

  Yes ☐: .....

- Colposcopy ☐
- Fibroids ☐

- Previous uterine endoscopic procedure: Myomectomy☐ Polypectomy☐

  hemostatic curettage ☐

  Other ☐ : .....

- Ovarian cyst: No☐

  Yes ☐ specify: ……

- Mammogram: No☐

  Yes ☐

  Result: …….....

- Breast neoplasia: No☐

  Yes ☐ specify…… .....

- Tamoxifen ☐
- Other: .....
- Previous pelvic irradiation ☐

2. CLINICAL CHARACTERISTICS OF ABNORMAL UTERINE BLEEDING (SUA)

- **Delay between the start of the SUA and the consultation:** .....
- **AUS Abundance:**
  - minimes ☐
  - of average abundance☐
  - abundant
- **AUS Type:**
  - Metrorrhagias ☐
  - Menorrhagia ☐

- Number of hemorrhage episodes: 1 ☐ 2 ☐ 3 ☐
- Associated functional signs:

  Pelvic pain ☐ Leucorrhea ☐, abdominal mass ☐, Hydrorrhea ☐Pyorrhea ☐

  Fatigue ☐Weight loss ☐anorexia ☐

  Other ☐ ……

3. <u>Complementary examination:</u>

- **Pelvic ultrasound:**
  - Uterine size: Normal ☐ increased ☐
  - Endometrial thickness (mm): …….
  - Vascularization Doppler sore: 1☐2☐ 3☐
  - Endometrial–myometrial interface: …….
  - Intracavitary image: ☐no Yes ☐, specify:…….
  - Other: …….
- **<u>Biology:</u>** Hemoglobin =…..g/dl
- **<u>Exploration of the uterin cavity :</u>**
  - Hysteroscopy and biopsy : ☐
  - hemostatic curettage: ☐
  - Quantity of curettage specimen : Scanty ☐ abundant ☐
- **<u>Time of the biopsy sample compared to the beginning of the symptomatology:</u> …….**
- **<u>Diagnosis at the biopsy:</u>** …….

4. **DEFINITIVE HISTOLOGICAL RESULTS:**…….

- **Delay between the preoperative diagnosis and the hysterectomy:** ……..
