==========

YouGov interviewed 1991 respondents who were then matched down to a sample of 1913 to produce the final dataset. The respondents were matched to a sampling frame on gender and age. The frame was constructed by stratified sampling from the 2015 Eurobarometer. The matched cases were then raked to known quantities for age X gender and vote choice in 2015 X region, vote choice in 2017, and estimates for social grade and attention to politics. The weights were trimmed to a maximum value of 7.
