- Two datasets are used in the analysis: (1) the National Longitudinal Study of Adolescent Health (Add Health); (2) and Department of Defense Health Related Behaviors (DOD HRB) 2008 Survey.
- All the analyses in the paper are conducted using STATA 13.
- We provide two STATA do files to conduct the analysis for each data set.
- The Add Health Data Access Information and Do files:
    - We used restricted data from the Wave I and Wave IV of the National Longitudinal Study of Adolescent to Adult Health (Add Health). The Add Health restricted data license can be obtained at:
        - http://www.cpc.unc.edu/projects/addhealth/data/restricteduse/add-health-restricted-use-data-contract-1
    - MS_17062_AddHealth_DataPrep_do: the STATA do file with codes for generating the analysis sample in the Add Health;
    - MS_17062_AddHealth_Analysis_do: the STATA do file with codes for producing all the estimates (i.e., tables) in the Add Health.
- The DOD HRB Data Access Information and Do files:
    - We used restricted data from the Department of Defense Health Related Behaviors 2008 Survey. The DOD HRB 2008 Survey data can be obtained at:
        - http://health.mil/Military-Health-Topics/Privacy-and-Civil-Liberties/Submit-a-Data-Sharing-Application
    - MS_17062_DODHRB_DataPrep_do: the STATA do file with codes for generating the analysis sample in the DOD HRB data;
    - MS_17062_DODHRB_DataPrep_do: the STATA do file with codes for producing all the estimates (i.e., tables) in the DOD HRB.
