In red are variable names corresponding to the dataset
~~Struckthrough~~ variables are redacted in the replication data to protect identifying information.

ENUMERATOR A: TALLY SHEET A

Enumerator A: This is part of Step 3. From outside the circle of focus group participants, observe what happens and fill in the tally sheet below.

A1A. ***Enumerator A***, ID / name: |__|__|__| / _____

A2. Village Name ~~(a3)~~ _____ **A3.** Village Code (id_vill) |__|__|__|

A4. Chiefdom Name ~~(a2)~~_____ **A5.** Chiefdom Code (a5) |__|__|__|__|

A8. District Name (a1)_____

A9. Date of Meeting ~~(a8)~~ (DD/MM/YY) |__|__|/|__|__|/|__|__|__|__|

A10. Time deliberation starts ~~(ms_a10)~~: HH:MM |__|__| : |__|__|

A11. Number of comments made by women (ms_a11) (TALLY WITH LINE MARKS):

	TOTAL (count at end): |__|__|__|

A12. Number of comments made by men (ms_a12) (TALLY WITH LINE MARKS):

	TOTAL (count at end): |__|__|__|

A13. Time deliberation ends ~~(ms_a13)~~: HH:MM |__|__| : |__|__|

A14. Which of the following deliberation types occurred during the meeting?

(SELECT ALL THAT APPLY) (1 = yes; 2 = no)

D2A. public debate (ms_a14_a) |__|
(opinions expressed loudly enough for all to hear)

D2B. private discussion among opinion leaders within meeting area (ms_a14_b) |__|
(not loud enough for all to hear)

D2C. group left meeting area to discuss separately (ms_a14_c) |__|
("hang heads")

D2D. vote (ms_a14_d) |__|

A15. Which best describes how the group eventually came to a conclusion? (ms_a15)

|___|

(1 = chief and/or elders decide without other input)

(2 = chief and/or elders decide with input mostly from other opinion leaders)

(3 = chief and/or elders decide with input from many people including non-opinion leaders)

(4 = open discussion followed by general consensus)

(5 = open discussion followed by group vote)

A16. In your opinion, how concentrated was the decision-making process? (ms_a16)

|___|

(Use scale of 1 to 4, guided by the following)

(1 = very concentrated: one person/small group decided with no input from others)

(2 = somewhat concentrated: small group decided, but with input from others)

(3 = not very concentrated: many people contributed with relatively equal influence)

(4 = not at all concentrated: entire community actively contributed)

A17. In your opinion, how actively did women participate in the deliberation compared to men? (ms_a17)

|___|

(Use a scale of 1 to 5, guided by the following)

(1 = women not active at all compared to men)

(2 = one or two women participate, but men dominate)

(3 = several women participate, but men largely dominate)

(4 = several women participate and play an active role, but still not as much as men)

(5 = no difference at all between participation of women & men)

A18. In your opinion, how actively did youths participate in the deliberation compared to non-youths? (ms_a18)

(Use a scale of 1 to 5, guided by the following)

|___|

(1 = youths not active at all compared to non-youths)

(2 = one or two youths participate, but non-youths dominate)

(3 = several youths participate, but non-youths largely dominate)

(4 = several youths participate and play an active role, but still not as much as non-youths)

(5 = no difference at all between participation of youths & non-youths)

A19. Was there a vote at any point? (ms_a19) 1= YES, 2 = NO |___|
