Our submission of "Focused Power: experiments, the Shapley-Shubik power index, and focal points" consists of five files, listed below. "Focused Power" uses data and procedures from four sheets in the Excel file *Focused Power Data*. Definitions and explanations of the variables are in comments attached to the variable names in the Excel file and are in the pdf file *Focused Power Variable Definitions*. We used EViews and Excel to analyse the data. The data comes from experiments conducted by the authors using public Australian university funds. Anyone has permission to use this data provided they cite this article as the source.

Focused Power Manuscript includes text and tables.

Focused Power Participant Instructions

Focused Power Risk Instrument

Focused Power Data includes raw data.

Focused Power Variable Definitions
