UTERUS TRANSPLANTATION

This form is intended for all Tunisian women. It is divided into three parts: the first focusing on socio-demographic characteristics, the second evaluating knowledge about uterine transplantation and the third describing the perception of Tunisian women on uterine transplantation.

NB: anonymity and confidentiality will be respected

1. SOCIO-DEMOGRAPHIC CHARACTERISTICS

1) Age:

2) Marital status:

Single

In a relationship

Bride

Widow

Divorced

3) Level of study

I have not studied

Primary

College

Secondary

Academic

4) Professional status

Without profession

Civil servant

Employee

Worker

Senior Manager

Liberal profession

student

5) Socio-economic level

Bas

Average

Student

6) Ethnic group

Arabic

Berber

Other

7) Religion

Muslim

Christian

Jewish

Other

8) Do you have any health problems?

Yes

No

If Yes, specify

9) Do you have children?

Yes

No

If Yes, specify the number

10) Was it about spontaneous pregnancy?

Yes

No

11) Do you have a history of abortions?

Yes

No

2. KNOWLEDGE ABOUT UTERINE TRANSPLANTATION

1) Have you ever heard of uterine transplant?

Yes

No

2) If yes, specify the sources of information

personal research

Books

Internet

social networks

Other:

3) The first uterine transplant took place in

2000

2011

2014

2016

I don’t know

4) Main causes of uterine graft failure

Intrauterine infection

Uterine artery thrombosis

Advanced age of the donor

I don’t know

5) The transplantation of the uterus can be performed

from a living donor

from a deceased donor

The two

I don’t know

6) If both, which one is more successful?

Living donor

Deceased donor

7) The average duration of the intervention in the donor is:

[4h-7h]

[7h-10h]

[10am-1pm]

I don’t know

8) The average duration of the intervention in the recipient is:

[2h-4h]

[4h-6h]

[6h-8h]

I don’t know

9) Does menopause affect the quality of the uterus to be transplanted?

Yes

No

I don’t know

10) The operation for the donor can be done:

By laparotomy

By laparoscopy

The two

I don’t know

11) The recommended time for pregnancy after uterus transplantation is:

3 months

6 months

1 year

2 years

I don’t know

12) The risk of fetal malformation is higher in transplanted women who take immunosuppressive drugs during pregnancy:

Yes

No

I don't know

13) Should a hysterectomy (removal of the uterus) be performed after having had one or two children from the transplanted uterus?

Yes

No

I don't know

3. PERCEPTIONS ON THE UTERINE TRANSPLANT

1) Would you consider donating your uterus after you pass away?

Yes

No

I don't have a uterus

2) Obstacles to the donation of the uterus

I do not wish to donate my organs because I am afraid of surgical interventions.

I am concerned about not being 'whole' after death if I donate.

I'm afraid that the diagnosis of brain death will be made more quickly if I choose to become an organ donor.

In my culture the donation of uterus is unacceptable

Religious barriers prevent me from giving my uterus.

I don't intend to donate my uterus because it's not a vital transplant.

3) The use of my uterus by another woman will be perceived as an "extension of life":

Completely agree

1

2

3

4

5

Not at all agree

4) I see organ donation, including that of the uterus, as a way to contribute to society

Completely agree

1

2

3

4

5

Not at all agree

5) I feel joy knowing that by donating my uterus after my death, I will be able to help bring new life into the world.

Completely agree

1

2

3

4

5

Not at all agree

6) What do you think about a vaginal examination and a vaginal ultrasound performed after the confirmation of death?

Completely agree

1

2

3

4

5

Not at all agree

7) **Do you think that the uterine transplant should be approved by the national center for the promotion of organ transplantation)?**

Yes

No
