v2csprtcpt	480	1.019	0.785	-0.143	2.940
v2clacjstw	480	1.160	0.897	-0.194	3.514
Number of coun_id	10	10	10	10	10

LGBTQ social movements are coded as dummy variables, reflecting short-term and long-term aftermaths of cases of activism. For short-term, $e_lgbt_SR = 0$ if no LGBTQ social movement has occurred in the country's region within the previous 12 months, and $e_lgbt_SR = 1$ otherwise. For long-term, $e_lgbt_LR = 0$ if no LGBTQ social movement has occurred in the country's region within the previous month, and $e_lgbt_SR = 1$ for all months including and after the movement. The dependent variable (whc) reflects the number of hate crimes per million people, per month, in a country.

Table B2. Descriptive Statistics for Regression Group 1b (OSCE, Media Activism Index)

VARIABLES	N	mean	sd	min	max
whc	369	0.341	0.355	0	3.049

Number of coun_id	10	10	10	10	10

LGBTQ activism is proxied by the monthly percentage of media stories covering grassroots LGBTQ social movements in a given time frame, or variables *media_a* and *media_a_lg12*. These variables capture media coverage of activism in the short-term (within the first 12 months after the event) and long-term (over 12 months after the event), respectively, in a country. The dependent variable (*whc*) reflects the number of hate crimes per million people, per month, in a country.

Table B3. Descriptive Statistics for Regression Group 2a (Media Violence Index, Event Dummies)

VARIABLES	N	mean	sd	min	max
media_v	600	0.0842	0.135	0	1.718
e_lgbt_SR	600	0.180	0.385	0	1
e_lgbt_LR	600	0.523	0.500	0	1
v2x_freexp_altinf	600	0.688	0.191	0.291	0.979
v2x_gencs	600	0.849	0.0694	0.665	0.938
