Replication files for "Weather, Risk, and Voting: an Experimental Analysis of the Effect of Weather on Vote Choice"

The zip file includes the following files:

- **Instructions**
- **JEPS_raw** (excel spreadsheet with raw data);
- **Legend for JEPS_raw** (word file with legend of variables in the JEPS_raw excel file)
- **JEPS_dataset** (excel spreadsheet with final dataset). This file includes four sheets. The first one contains the dataset. The following three sheets contain the descriptive statistics (mean, standard errors, etc) and the Welch tests for the Objective Weather assessment, the Relative Precipitation, the Absolute Precipitation, and the Subjective Weather assessment, respectively.
- **Description for JEPS_dataset** (word file with description of variables added to the raw data to create the final dataset used in the analysis)
- **mood and mood_regressions** (Eviews files for the regressions in Table 5 of main text)
- **Table A3** (Eviews files for the balance test regressions in Table A3 of the Appendix)
-**Readme_Eviews (**text file with legend of variables in the mood Eviews files)
