kegg enrichment
Ubiquitin mediated proteolysis
Starch and sucrose metabolism
Spliceosome
RNA transport
RNA degradation
Protein processing in endoplasmic reticulum
Plant−pathogen interaction
Plant hormone signal transduction
Phosphatidylinositol signaling system
Nucleotide excision repair
mRNA surveillance pathway
MAPK signaling pathway − plant
Inositol phosphate metabolism
Glycerophospholipid metabolism
Glycerolipid metabolism
Glutathione metabolism
DNA replication
Circadian rhythm − plant
Ascorbate and aldarate metabolism
Aminoacyl−tRNA biosynthesis
