The Most Enriched Kegg Terms
Circadian rhythm − plant
Ascorbate and aldarate metabolism
RNA degradation
Phosphatidylinositol signaling system
Inositol phosphate metabolism
Nucleotide excision repair
Plant hormone signal transduction
Plant−pathogen interaction
DNA replication
Protein processing in endoplasmic reticulum
MAPK signaling pathway − plant
Glycerophospholipid metabolism
Ubiquitin mediated proteolysis
Glycerolipid metabolism
Glutathione metabolism
mRNA surveillance pathway
RNA transport
Starch and sucrose metabolism
Aminoacyl−tRNA biosynthesis
Spliceosome
Phagosome
Phenylpropanoid biosynthesis
Oxidative phosphorylation
Peroxisome
Cysteine and methionine metabolism
Glycolysis / Gluconeogenesis
Ribosome
Endocytosis
Pentose and glucuronate interconversions
