kegg enrichment
Zeatin biosynthesis
Thiamine metabolism
Selenocompound metabolism
RNA degradation
Plant hormone signal transduction
Photosynthesis − antenna proteins
Phosphonate and phosphinate metabolism
Nitrogen metabolism
mRNA surveillance pathway
Monoterpenoid biosynthesis
Monobactam biosynthesis
Mismatch repair
Inositol phosphate metabolism
Homologous recombination
Fructose and mannose metabolism
Ether lipid metabolism
Circadian rhythm − plant
Biotin metabolism
Arginine biosynthesis
AGE−RAGE signaling pathway in diabetic complications
