Module 11A: Digits Forward Test

Note to Surveyor: *Please ensure that only the respondent is present to answer the questions. If others gather while administering these modules, you should stress that this section of the survey is private and confidential.*

Please read this text out loud:

"I would like to now play a game called Digits Forward game. It is designed to measure your short term memory and is not a test of intelligence. Listen carefully as I say some numbers. When I finish, you should repeat them back to me in the same order I said them to you. For example, if I say 7866, you say 7866. Or if I say 1112, you say?"

Answer - 1112; Even if the respondent does not answer correctly, please continue with the test.

"I will read each set of numbers only once so be careful to pay attention the first time. If you miss what I've said the first time, just try your best to repeat whatever you heard."

Note to Surveyor:

For each trial –

- You should read the numbers at a rate of one per second.
- You should first read the numbers for A and then the numbers for B.
- Do NOT let the respondent see the test answers.
- You should record in SurveyCTO whether the respondent's answer was correct or incorrect.

Instructions for SurveyCTO Coding and Calculation of Final Score:

- If the respondent answers **both A and B correctly**, SurveyCTO will go to the next trial.
- If the respondent answers **A correctly but answers B incorrectly**, SurveyCTO will go to the next trial.
- If the respondent answer **A incorrectly but answer A correctly**, SurveyCTO will go to the next trial.
- If the respondent answers **both A and B incorrectly**, SurveyCTO will score the test and **skip to 11B.a**.
  To calculate the total score for the Digits Forward Test, SurveyCTO will count the number of times that the respondent answered correctly. For example, if the respondent answered both A and B correctly in Trial 1 and A and B correctly in Trial 2, then the respondent's total score for the Digits Foward Test is 4.

11A.a	Trial 1	A. 3—8—6	Correct Incorrect	1 0

Module 11B: Digits Backwards Test

Note to Surveyor: *Please ensure that only the respondent is present to answer the questions. If others gather while administering these modules, you should emphasize that this section of the survey is private and confidential.*

Please read this text out loud:

"Now we'll do the same thing, except this time I'll read the digits forward and you repeat them to me backwards. For example, if I say 501, you say 105. Or if I say 5678, you say?"

Answer - 8765; Even if the respondent does not answer correctly, please continue with the test.

"Again, I'll only say each set of number once, so be careful to pay attention the first time. If you miss what I've said, just try your best to repeat what you remember."

Note to Surveyor:

For each trial -

- You should read the numbers at a rate of one per second.
- You should first read the numbers for A and then the numbers for B.
- The correct answer will be mentioned on the screen.
- Do NOT let the respondent see the correct answers.
- You should record in SurveyCTO whether the respondent's answer was correct or incorrect.

Instructions for SurveyCTO Coding and Calculation of Final Score:

- If the respondent answers **both A and B correctly**, SurveyCTO will go to the next trial.
- If the respondent answers **A correctly but answers B incorrectly**, SurveyCTO will go to the next trial.
- If the respondent answer **A incorrectly but answer A correctly**, SurveyCTO will go to the next trial.
- If the respondent answers **both A and B incorrectly**, SurveyCTO will score the test and **skip to 12.a**.

To calculate the total score for the Digits Forward Test, SurveyCTO will count the number of times that the respondent answered correctly. For example, if the respondent answered both A and B correctly in Trial 1 and A and B correctly in Trial 2, then the respondent's total score for the Digits Foward Test is 4.

Module 13: Raven's Test

Note to Surveyor: *For this module, please ensure that only the respondent is present to answer the questions. If others gather while administering these modules, you should emphasize that this section of the survey is private and confidential.*

Please read this text out loud:

"Now, I am going to show you a box with a picture in it and with a piece cut out of the picture. The picture follows a pattern from left to right and top to bottom. Look at the picture in the box, and think what the missing piece must be to complete the pattern correctly both across (left to right) and down (top to bottom). Find the right piece out of the six pieces shown below the picture. Only one of these pieces is correct. Identify which piece is the one that is missing and tell me your choice. I will first show you an example that is not part of the test."

[Show Test 0 as example]

"Here is an example. Looking at the box from left to right, you can see that the missing piece should have two wavy lines going from left to right and a straight line going from top to bottom. Choice A is the answer."

Please read this text out loud:

"Now, I will show you the questions for this test. Remember, there is a right answer, so take your time and choose which piece you think is most correct. There is always only one right answer. If you can't solve the problem, just say you don't know and we will move on to the next question."

Note to Surveyor:

For each test –

- Allow the respondent to look at each picture and then respond.
- You should record the respondent's answer on surveyCTO

Instructions for SurveyCTO Coding and Calculation of Final Score:

To calculate the total score for the Raven's Test, SurveyCTO will count the number of times that the respondent answered correctly. The total number of tests that the respondent answered correctly is the respondent's score. For example, if the respondent answered Test 1, Test 3, Test 4, Test 10 and Test 11 correctly, then the respondent's score is 5.
