CROP REPORTING BOARD

VEGETABLES - PROCESSING

ANNUAL SUMMARY

1962

Production of the 10 principal vegetable crops grown for commercial processing reached a new record of 9,263,340 tons during 1962, according to the annual summary of the Crop Reporting Board. This total is 13 percent more than the 8,176,250 tons of the same crops produced in 1961, 26 percent more than aggregate production in 1960, and 11 percent more than the previous record of 8,376,320 tons set in 1956.

The new high in total output of vegetables for freezing and canning this year was primarily the result of the largest tomato crop ever produced. Tonnage in 1962 was 25 percent more than in 1961 and tomatoes accounted for 57 percent of the total 1962 tonnage of all processing vegetables. Record crops of beets for canning, sweet corn and asparagus were also attained in 1962. Production of beets for canning this season was 15 percent above last year, sweet corn 4 percent above and asparagus 3 percent. Tonnage of green peas was up 3 percent in 1962 over 1961. Production of the 5 other crops included in this summary was smaller this year than last. Percentage declines from 1961 were: cabbage for sauerkraut, 4 percent; green lima beans, snap beans, and cucumbers for pickles, each 6 percent; and spinach 19 percent. Production of 1962 crop spinach was the smallest since 1954.

In this summary, estimates of yield, production and price of cucumbers for pickles are expressed in tons rather than in the bushel unit used heretofore. Estimates for the years 1951-60 have been converted to a comparable series in a supplement to Statistical Bulletin No. 299 which is available on request. Estimates of the utilization of spinach for processing are given for the first time in this publication. Data for 1961 and 1962 acreage, yield, production, price and value of spinach used for freezing and used for canning are shown. This detail was not compiled in earlier years and long-time averages are not available.

Value of all vegetables harvested for processing in 1962 totaled $360,289,000. In 1961, value was $336,884,000 and in 1960, $287,430,000.

Rank of the 5 leading States in acreage harvested, production, and value of vegetables grown for freezing and canning in 1962 is as follows:

LEADING PROCESSING VEGETABLE STATES IN 1962

Rank	ACREAGE		PRODUCTION		VALUE	
	State	Percent of total	State	Percent of total	State	Percent of total
1	Wisconsin	16.4	California	37.0	California	33.9
2	California	15.8	Wisconsin	8.2	Wisconsin	7.4
3	Minnesota	9.2	New York	5.3	Oregon	6.6
4	Washington	7.0	Ohio	5.3	New Jersey	6.0
5	Illinois	6.8	Illinois	5.2	Washington	5.7

This report is made possible through the cooperation of vegetable processors who provided basic statistics concerning their operations.
