Farm Labor

Release
March 10, 1969
3:00 P.M. (E.S.T.)

Heavy Rain Disrupts Citrus Harvest

The Nation's total farm labor force for the survey week of February 16-22 dropped 3 percent from the February 1968 survey week. Total workers on farms are estimated at 3,614,000 -- including 2,917,000 farm operators and unpaid family members and 697,000 hired persons. The total worker estimate represents a 6 percent seasonal gain from the January 1969 survey week.

Farm workers averaged 33.3 hours during the February survey week, virtually unchanged from a month ago. Farm operators worked an average of 35.0 hours, other unpaid family members 28.7 hours, and hired workers 32.7 hours during the week.

Precipitation occurred during the survey week throughout the entire country. California was again deluged by heavy rains with drifting snow in the mountains. Heavy rain soaked much of the South Central States while rain and snow prevailed on the Eastern Seaboard. Lighter amounts were recorded elsewhere. Temperatures plummetted in the southern and western States while a warm spell dominated from the Northern Great Plains to New England.

Rains interrupted harvest of California navel orange and lemon crops. Citrus harvest slowed in Arizona and Texas. A decline in Florida's orange harvest was noted; new blooms were increasing. Deciduous fruit growers were applying dormant spray and pruning where weather conditions permitted.

Vegetable harvest continued heavy in Florida. Activity in Texas was interrupted by rains. Rain and wet field limited winter vegetable harvest in California. Strawberry picking in southern California got underway. Planting of spring crops was in progress where possible.

Tobacco plantbed preparation and seeding made very little progress during the survey week. Sugarcane harvest neared completion. Other farm activities were limited to livestock care, machinery repair, and general chores.

SPECIAL IN THIS ISSUE

Revised Farm Employment Estimates, 48 States 1968, by Months and annual averages

UNITED STATES DEPARTMENT OF AGRICULTURE
Statistical Reporting Service
La 1 (3-69)
Crop Reporting Board
Washington, D. C.

Annual Average Farm Employment -- Continues Downward Trend

Annual average farm employment for 1968 dipped 3 percent from the 1967 average. The annual average of 4,746,000 persons consisted of 3,532,000 family and 1,213,000 hired workers.

Farm employment represents number of family and hired labor working during the survey week. Family labor includes farm operators working on farms one hour or more plus other family members working 15 hours or more without receiving cash wages during survey week. Hired workers include all persons working one hour or more for cash wages during the survey week. These data should not be confused with the data published by the Bureau of Labor Statistics (BLS) derived from the Current Population Survey (CPS). *The BLS data are derived from a household* survey where each member 16 years of age and older is classified as performing farm or nonfarm work on the basis of major activity during the survey week.
