README

This folder contains the replication material for “The Demographic Dividend Is More Than an Education Dividend” by Rainer Kotschy, Patricio Suarez Urtaza, and Uwe Sunde (2020). The folder contains the following files:

- *kss_data:* The dataset
- *kss_replication_file*: The Stata do-file for the replication of the results

All files have been created with Stata version 16.1. The replication material requires Stata version 14 or higher. To replicate the results, open the do-file and run the preamble to change the directory and to load the dataset. Before running the code, it is necessary to install the user-written packages *reghdfe*, *ftools*, *moremata*, *estout*, and *coefplot*, which are required to produce the results in the paper. Once the packages have been installed, choose the code for the content you want to replicate, select the code, and run it.
