Instructions to replicate output for Table 3

To replicate results reported in Table 3, researchers just need to open the SPSS file 'Spain2015-CIS' (CIS dataset nº3126), which contained post-election survey of the 2015 Spanish legislative elections. The dependent variable is vote choice, named in the file as 'vote_recoded_multi'. As for independent variables, the list of variables included in the model is described in the table below.

Coding of variables

Variable	**Coding**
Gender	1: Male; 2: Female
Age	continuous
Education	1: no education; 5: undergraduate or more
Religion	1: never; 5: many times a week
Working class	0: other; 1: working class
Inactive	0: other; 1: inactive
Ideology	1: extreme left; 10: extreme right
Party identification	1: yes; 2: no
Non voter	0: voter; 1: non voter
Satisfaction with democracy	0: no satisfied; 10: satisfied
Evaluation political situation	1: very bad; 5: very good
Evaluation economic situation	1: very bad; 5: very good
Trust in political parties	0: distrust; 10: trust
Lost Job	0: no; 1: yes
