ARTICLE: 1033 Program Data for Studying Policing and Militarization: An Open-Source Database in Response to the Recommendations of Koslicki (2023)
AUTHORS: Nathan Connealy, Abigail Blanco, Chivon Fitch

Replication data, code, codebooks, and transparency statements needed to produce the database presented in the associated article are included in the zipped folder download. Please direct any questions or concerns to Nathan Connealy nconnealy@ut.edu.

Future 1033 quarterly releases will result in updated versions of all relevant files and the archiving of past data.

The replication script includes details for reproducing the database with step-by-step instructions. The list below details the specific files associated with the replication materials.

As noted in footnote 4 in the associated journal article, the Harvard Dataverse does not preserve the file structure of the Dropbox link to the data (separate folders cannot be uploaded to the Dataverse). If users want to replicate the database or access the finalized data, they can follow the steps outlined in the article, readme file, replication code, transparency statements and codebooks. Each of these files has been named with the starting prefix "0_" so that they are listed first in the Harvard Dataverse file structure. The Dropbox link with structured file folders is also available here: https://www.dropbox.com/sh/spfvxdotexox64k/AAC2TaAK3i_IhYORMJ6K3peda?dl=0
