Replication material for the paper "Police Militarization and Local Sheriff Elections" by Christos Mavridis, Orestis Troumpounis, and Maurizio Zanardi; published in the *Journal of Law, Economics, & Organization*

In order to replicate all the econometric results shown in the paper:

- Place all the replication files (i.e., one program and one dataset) in one directory.
- Using Stata, run "replication.do" to replicate all the econometric results reported in the paper.
- The file "replication.pdf" reports the output we obtained by running "replication.do" on Stata (version 15).
- Notice that you may have to add some add-on Stata commands (e.g., ivreghdfe)

List of files included in the replication folder:

- dataset.dta: dataset
- replication.do: do file for all econometric results
- replication.pdf: pdf file of output obtained from running "replication.do"
