Crisis Management and Territorial Preferences: Experimental Evidence from the Pandemic

Sandra León Alfonso and Amuitz Garmendia Madariaga

October 2025

README - Data Publication Notes

This article draws on survey data collected within the framework of the project **"Citizens' Attitudes Under the COVID-19 Pandemic"**, an international collaborative initiative conducted throughout 2020. The **project was coordinated** by Sylvain Brouard (Sciences Po, CEVIPOF), Michael Becher (IAST, University of Toulouse 1), Martial Foucault (Sciences Po, CEVIPOF) and Pavlos Vasilopoulos (University of York and CEVIPOF) and involved contributions from multiple research team members across 13 countries, including (non-exhaustively): **Sylvain Brouard** (Sciences Po – CEVIPOF & LIEPP), **Michael Becher** (IE University & Institute for Advanced Studies in Toulouse), **Eric Bélanger** (McGill University), **Ruth Dassonneville** (Université de Montréal), **Jean-François Daoust** (University of Montreal), **Martial Foucault** (Sciences Po – CEVIPOF), **Vincenzo Galasso** (Bocconi University), **Christoph Hönnige** (University of Hanover), **Eric Kerrouche** (Sciences Po – CEVIPOF), **Hanspeter Kriesi** (EUI), **Sandra León** (Universidad Carlos III de Madrid), **Richard Nadeau** (Université de Montréal), **Vincent Pons** (Harvard Business School), **Dominique Reynié** (Sciences Po – CEVIPOF), **Daniel Stegmueller** (Duke University), and **Pavlos Vasilopoulos** (University of York).

For the purposes of this article, we employ project-specific country-wave samples, focusing on the two self-designed experiments of primary interest.
