Questionnaire for Round-2

NB: this questionnaire was built electronically online (using Google Forms)

Thank you for agreeing to participate in our study. It is very important that you complete the questionnaires in each round. For the Delphi-Process to be methodological sound participants are requested to participate in two rounds. Therefore, once we have all the responses to this questionnaire we will be contacting you again to participate in a second and final round.

The reliability of the results could be compromised if people drop out of the study before it is completed.

Your initials ……..
Your year of birth ……
Your gender: male [ ] female [ ]
Your level of expertise: Paediatrician [ ] Resident [ ] Other [ ] ……..
Your place of work: Rwanda [ ] Other [ ] ……..
Your work status: Full time [ ] part-time [ ] retired [ ] Other [ ] ……..
Country where you gained your medical degree
Rwanda [ ] USA [ ] Great Britain [ ] Other [ ] ……..
Your year of gaining medical degree ……
Do you treat children with congenital abnormalities:
Never [ ] rarely [ ] sometimes [ ] frequently [ ] very frequently [ ]

Question 1: On reviewing the current draft of outcomes to be included (see word document with email), are there any outcomes that you feel have not been included that SHOULD be included in the Rwandan Congenital Abnormalities Surveillance Program?
(You may list these or write free text, as you wish. You do not need to write a justification of your additions)

Questionnaire for Round-3

NB: this questionnaire was built electronically online (using Google Forms)

Your initials ……..
Your year of birth ……
Your gender: male [ ] female [ ]
Your level of expertise: Paediatrician [ ] Resident [ ] Other [ ] ……..
Your place of work: Rwanda [ ] Other [ ] ……..
Your work status: Full time [ ] part-time [ ] retired [ ] Other [ ] ……..
Country where you gained your medical degree
Rwanda [ ] USA [ ] Great Britain [ ] Other [ ] ……..
Your year of gaining medical degree ……
Do you treat children with congenital abnormalities:
Never [ ] rarely [ ] sometimes [ ] frequently [ ] very frequently [ ]

Where 1-3 are unimportant, 4-6 is ambilivant and 7-9 is important, how important is it that the following are included in the Rwandan Congenital Abnormalities Surveillance Program.

	1	2	3	4	5	6	7	8	9
Cleft palate	[ ]	[ ]	[ ]	[ ]	[ ]	[ ]	[ ]	[ ]	[ ]

All items from Round-2 were then presented, in relevant domains, with same 1-9 scoring system
