82. We would like to get your feelings toward several religions. Below you will read ten different religions and we would like you to rate each religion using something we call the feeling thermometer. Ratings between 50 degrees and 100 degrees mean that you feel favorably and warm toward the religion. Ratings between 0 degrees and 50 degrees mean that you don't feel favorably toward the religion and that you don't care very much for that religion. You would rate the religion at the 50 degree mark if you don't feel particularly warm or cold toward the religion.
