September 22, 2012

Author's Note

There are two folders containing Stata data, and do and log-files. These are associated with the empirical models reported in Seung-Whan Choi and Shali Luo, ????. "Economic Sanctions, Poverty, and International Terrorism: An Empirical Analysis," *International Interactions* ??(?):???-???.

Note that the estimation time for Model 6 in Table 1 will take much longer than usual due to a convergence issue.

Questions or comments regarding these materials should be directed to Seung-Whan Choi, Department of Political Science, University of Illinois at Chicago. His email address is whanchoi@uic.edu and his webpage address is http://www.uic.edu/~whanchoi.

Data Sources[1]

International terrorism (DV)
Mickolus et al.'s (2006) International Terrorism: Attributes of Terrorist Events (ITERATE)
Enders, Sandler, and Gaibulloev (2011)
LaFree and Dugan's (2007) Global Terrorism Database (GTD)

Economic sanctions (Main IV)
Hufbauer et al.'s (2008) sanction episodes
Drezner (1999) and O'Sullivan (2003)

Control variables:
Democracy, Polity IV
State failure, Political Instability Task Force (2007)
Economic development, Gleditsch (2002) and Heston, Summers, and Aten (August 2009)
Population, U.S. Census Bureau (2008)
Interstate dispute, Gleditsch et al. (2002)
Post-Cold War
Lagged term for the dependent variable
