Codebook for data_in.RData

7/16/2019

Overview

This file consists of 2 datasets: `af.final.sub` and `am.final.sub`. These are both created from jtpa.RData with the following subsetting and variable creation:

- `af.final.sub`: This is `jtpa.RData` subsetted to `demog==2` (adult female) and to only ENP and treated units (for adult females)
  - `race3` is a 3 category variable crated from `race`
  - Compliance (`enroll`) set to 0 for ENPs
- `am.final.sub`: This is `jtpa.RData` subsetted to `demog==1` (adult male) and to only ENP and treated units (for adult males)
  - `race3` is a 3 category variable crated from `race`
  - Compliance (`enroll`) set to 0 for ENPs
