54	**The Step for Excel Solver**					
55	1. Put an initial value such as 10 into B18.					
56	2. Set B22 as the target cell.					
57	3. Set B18 as the change cell.					
58	4. Restrict that B37=0.05.					
59	5. Minimze the target cell.
