LANSING

GARLIN GILCHRIST II
LT. GOVERNOR

EXECUTIVE ORDER

No. 2020-186

SENATE JOURNAL
SEP 30 2020 AM8:48

Declaration of state of emergency and state of disaster related to the COVID-19 pandemic

Rescission of Executive Order 2020-177

Where Michigan was once among the states most heavily hit by COVID-19, our per-capita rate of new daily cases has plateaued at a level well below the national average. Despite gradually reopening our economy, Michigan's seven-day case positivity rate has remained between 3.0% and 3.7% since early July. Over the same time period, case growth has also remained within a narrow band of 61 to 71 daily new cases per million population, by date of symptom onset. As Michigan students have returned to in-person learning, schools and colleges have become the leading source of outbreaks in our state, surpassing nursing homes for the first time. Moreover, the number of counties experiencing severe outbreaks (in excess of 100 cases per million per day) appears to be on the rise, raising the possibility that hospital systems could become overwhelmed if such flareups are not quickly extinguished.

There is much we do not know about this novel virus, but we know at least three things for certain: it is widespread, it is easily transmitted by airborne particles, and its effects can be fatal. That lethal combination, combined with ongoing uncertainty about how to defeat it, means that the health, economic, and social harms of the COVID-19 pandemic remain severe and affect every corner of this state. The COVID-19 pandemic therefore constitutes a statewide emergency and disaster.

On March 10, 2020, I issued Executive Order 2020-4, which declared a state of emergency in Michigan to address the COVID-19 pandemic. This disease, caused by a novel coronavirus not previously identified in humans, can easily spread from person to person and can result in serious illness or death. There is currently no approved vaccine.

Once detected, the virus quickly spread across Michigan. As of April 1, 2020, the state had 9,334 confirmed cases of COVID-19 and 337 deaths from the disease, with many thousands more infected but not yet tested. Exactly one month later, this number had ballooned to 42,356 confirmed cases and 3,866 deaths from the disease—a tenfold increase in deaths.

The virus's rapid spread threatened to overwhelm the state's health care system: hospitals in multiple counties were reportedly at or near capacity; medical personnel, supplies, and resources necessary to treat COVID-19 patients were in high demand but short supply; dormitories and a convention center were being converted to temporary field hospitals.

On April 1, 2020, in response to the widespread and severe health, economic, and social harms posed by the COVID-19 pandemic, I issued Executive Order 2020-33. This order expanded on Executive Order 2020-4 and declared both a state of emergency and a state of disaster across the state of Michigan. Like Executive Order 2020-4, this declaration was based on multiple independent authorities: section 1 of article 5 of the Michigan Constitution of 1963; the Emergency Management Act, 1976 PA 390, as amended, MCL 30.401 et seq.; and the Emergency Powers of the Governor Act of 1945, 1945 PA 302, as amended, MCL 10.31 et seq. On April 7, 2020, the Michigan legislature adopted a concurrent resolution to extend the states of emergency and disaster declared under the Emergency Management Act until April 30, 2020.

On April 30, 2020, finding that COVID-19 had created emergency and disaster conditions across the State of Michigan, I issued Executive Order 2020-67 to continue the emergency declaration under the Emergency Powers of the Governor Act, as well as Executive Order 2020-68 to issue new emergency and disaster declarations under the Emergency Management Act.

Those executive orders have been challenged in *Michigan House of Representatives and Michigan Senate v Whitmer*. On August 21, 2020, the Court of Appeals ruled that my declaration of a state of emergency, my extensions of the state of emergency, and my issuance of related executive orders clearly fell within the scope of the governor's authority under the Emergency Powers of the Governor Act.

Since I first declared an emergency in response to this pandemic, my administration has taken aggressive measures to fight the spread of COVID-19, prevent the rapid depletion of this state's critical health care resources, and avoid needless deaths. The best way to slow the spread of the virus is for people to stay home and keep their distance from others. To that end, and in keeping with the recommendations of public health experts, I issued orders restricting access to places of public accommodation and school buildings, limiting gatherings and travel, and requiring workers who are not necessary to sustain or protect life to remain at home. I also issued orders enhancing the operational capacity and efficiency of health care facilities and operations, allowing health care professionals to practice to the full extent of their training regardless of licensure, and facilitating the delivery of goods, supplies, equipment, and personnel that are needed to combat this pandemic. And I took steps to build the public health infrastructure in this state that is necessary to contain the spread of infection.

These statewide measures were effective. For example, a report released by the Imperial College COVID-19 Response Team showed that my actions significantly lowered the number of cases and deaths that would have occurred had the state done nothing. And while the virus remains aggressive and persistent—on September 28, Michigan reported a total of 122,735 confirmed cases and 6,729 deaths—the strain on our health care system has relented, even as our testing capacity has increased.

In the meantime, the economic toll continues to mount. Between March 15 and May 30, Michigan received 2.2 million initial unemployment claims—the fifth-highest nationally, amounting to more than a third of the Michigan workforce. During this crisis, Michigan has often processed more unemployment claims in a single day than in the most painful week of the Great Recession, and the state already saw its highest unemployment rate since the Great Depression (22.7% in April). The Michigan Department of Treasury projects that the pandemic will cost the state $1 billion in revenue this fiscal year. Even as Michigan experiences unemployment rates not seen in decades, federal unemployment assistance has dwindled from $600 per week to $300. Without further action by Congress, even this limited federal assistance will run out.

In addition to these challenges, many Michigan students have returned to in-person instruction. Meanwhile, the state has seen schools and colleges become the leading source of outbreaks, even ahead of nursing homes. In addition to the risk of fatalities among our younger age groups, we are still learning about the long-term health consequences of this, including impacts on the heart, lungs, kidneys, and brain, which could impact generations for years to come.

The health, economic, and social harms of the COVID-19 pandemic thus remain widespread and severe, and they continue to constitute a statewide emergency and disaster. Though local health departments have some limited capacity to respond to cases as they arise within their jurisdictions, state emergency operations are necessary to bring this pandemic under control in Michigan and to build and maintain infrastructure to stop the spread of COVID-19, trace infections, and to quickly direct additional resources to hot-spots as they emerge. State assistance to bolster health care capacity and flexibility also has been, and will continue to be, critical to saving lives, protecting public health and safety, and averting catastrophe. Moreover, state disaster and emergency recovery efforts remain necessary not only to support Michiganders in need due to the economic effects of this pandemic, but also to ensure that the prospect of lost income does not impel workers who may be infected to report to work.

Statewide coordination of these efforts is crucial to creating a stable path to recovery. Until that recovery is underway, the economic and fiscal harms from this pandemic have been contained, and the threats posed by COVID-19 to life and the public health, safety, and welfare of this state have been neutralized, statewide disaster and emergency conditions will exist.

Acting under the Michigan Constitution of 1963 and Michigan law, I order the following:

1. The COVID-19 pandemic constitutes a disaster and emergency throughout the State of Michigan.

2. This order constitutes a state of emergency declaration under the Emergency Powers of the Governor Act of 1945. Subject to the ongoing litigation, and the possibility that current rulings may be overturned or otherwise altered on appeal, and to the extent the governor may declare a state of emergency and a state of disaster under the Emergency Management Act of 1976 when emergency and disaster conditions exist yet the legislature has not granted an extension request,

this order constitutes a state of emergency and state of disaster declaration under that act.

3. This order is effective immediately and continues through October 27, 2020 at 11:59 pm. I will evaluate the continuing need for this order.

4. Executive Order 2020-177 is rescinded. All previous orders that rested on that order now rest on this order.

Given under my hand and the Great Seal of the State of Michigan.

Date: September 29, 2020

Time: 6:15 pm

GRETCHEN WHITMER
GOVERNOR

By the Governor:

SECRETARY OF STATE
