Confirms 746 Additional Coronavirus Cases in New York State - Bringing Statewide Total to 417,589; New Cases in 43 Counties

Governor Andrew M. Cuomo today announced that an additional state meets the metrics to qualify for the travel advisory requiring individuals who have traveled to New York from those states, all of which have significant community spread, to quarantine for 14 days. The newly-added state is Rhode Island. Delaware and Washington, D.C. have been removed. The quarantine applies to any person arriving from an area with a positive test rate higher than 10 per 100,000 residents over a 7-day rolling average or an area with a 10 percent or higher positivity rate over a 7-day rolling average.

"Our progress in New York is even better than we expected, thanks to the hard work of New Yorkers. Our numbers continue to decline steadily, and for the third straight day in a row, there were no reported deaths in New York City," **Governor Cuomo said.** "But we must protect that progress, which is why today we are adding another state to our travel advisory. We cannot go back to the hell we experienced just a few months ago - and surging infection rates across the country threaten to bring us back there - so we must all remain vigilant."

The full, updated travel advisory list is below:

- Alaska
- Alabama
- Arkansas
- Arizona
- California
- Florida
- Georgia
- Iowa
- Idaho
- Illinois
- Indiana
- Kansas
- Kentucky

- Nebraska
- New Mexico
- Nevada
- Ohio
- Oklahoma
- Puerto Rico
- Rhode Island
- South Carolina
- Tennessee
- Texas
- Utah
- Virginia
- Washington
- Wisconsin

Delaware and Washington, D.C. have been removed from the travel advisory. Individuals in quarantine after traveling from a state that has been removed from the advisory should continue to quarantine for the full 14 days.
