NONESSENTIAL OR ELECTIVE SURGERIES AND PROCEDURES

SECTION EIGHT. Pursuant to Iowa Code § 135.144(3), and in conjunction with the Iowa Department of Public Health, unless otherwise modified by subsequent proclamation or order of the Iowa Department of Public Health, I order that effective at 12:01 a.m. on November 17, 2020, and continuing until 11:59 p.m. on December 10, 2020:

A. A hospital, outpatient surgery provider, or outpatient procedure provider may conduct in-patient surgeries and procedures that, if further delayed, will pose a significant risk to quality of life and any outpatient surgeries or procedures if the hospital or provider complies with the following requirements:

(1) A hospital or provider must have:

(a) Adequate inventories of personal protective equipment (PPE) and access to a reliable supply chain without relying on state or local government PPE stockpiles to support continued operations and respond to an unexpected surge in a timely manner; and

(b) A plan to conserve PPE consistent with guidance from the CDC and Iowa Department of Public Health;

(2) A hospital or provider must have a plan for timely COVID-19 testing of symptomatic patients and staff to rapidly mitigate potential clusters of infection and as otherwise clinically indicated. Providers must comply with any relevant guidance related to testing requirements for patients and staff issued by the Iowa Department of Public Health, the CDC, or a provider's professional specialty society. For scheduled surgeries patients should have a negative COVID-19 test performed within 72 hours of surgery date. If a COVID-19 test is not available, a hospital or provider should consider alternative methods to determine the patient's probability of COVID-19. If the patient has symptoms of fever, cough, or low oxygen saturation, then postponing the surgery is recommended.

(3) A hospital must continue to accept and treat COVID-19 patients and must not transfer COVID-19 patients to create capacity for elective procedures.

(4) A hospital must reserve at least 10% of intensive care unit (ICU) beds and 10% of medical/surgical beds for COVID-19 patients.

(5) The total number medical/surgical and observational beds used for an in-patient nonessential surgery or procedure must be no more than 50% of the number of such beds that were used on average during the month of September 2020.

(6) A hospital or provider that begins conducting surgeries or procedures as authorized by this paragraph but is no longer able to satisfy all these requirements must cease conducting such surgeries or procedures except as authorized by paragraph B. All hospitals and providers shall have a plan in place to monitor compliance and a transition plan to reduce or suspend procedures and surgeries as necessary.

B. Except as provided in paragraph A, all nonessential or elective surgeries and procedures that utilize PPE must not be conducted by any hospital, outpatient surgery provider, or outpatient procedure provider, whether public, private, or nonprofit.

C. A nonessential surgery or procedure is one that can be delayed without undue risk to the current or future health of a patient, considering all appropriate factors including, but not limited to any: (1) threat to the patient's life if the surgery or procedure is not performed; (2) threat of permanent dysfunction of an extremity or organ system; (3) risk of metastasis or progression of staging; and (4) risk of rapidly worsening to severe symptoms.

D. Each hospital, outpatient surgery provider, and outpatient procedure provider shall limit all nonessential individuals in surgery and procedure suites and patient care areas where PPE is required. Only individuals essential to conducting the surgery or procedure shall be present in such areas.

E. Each hospital, outpatient surgery provider, and outpatient procedure provider shall establish an internal governance structure to ensure that the principles outlined above are followed.
