Amendment to the Order of the Secretary of the Pennsylvania Department of Health to Stay at Home

As the COVID-19 disaster emergency in the Commonwealth continues, the Governor's Administration has developed a measured and strategic approach to allowing Pennsylvanians to return to work safely in a manner designed to prevent a resurgence of the virus. This strategic phased reopening of the Commonwealth will be done in the most effective, efficient, and risk-averse method possible to balance our return to economic stability, while at the same time continuing to keep Pennsylvanians safe by controlling the spread of disease. During the phased reopening process, it is necessary to extend the requirements in my Stay At Home Order with the recognition that such requirements may be suspended for specific counties as part of the gradual and strategic approach to reopening the Commonwealth.

Therefore, on this day, May 7, 2020, I hereby amend my Order directing individuals to "Stay at Home" dated Apri1 1, 2020, as amended.

The second sentence of the last paragraph of that Order is amended to read as follows:

This Order is effective immediately and will remain in effect through June 4, 2020.

The Order remains unchanged in every other respect.

Rachel L. Levine, M.D.
Secretary of Health
