COVID-19 UPDATE MARCH 19, 2020

In consideration of social distancing, venue closings, and meeting cancellations in response to the COVID-19 Pandemic, the Arizona Department of Agriculture is extending Applicator Certification (CA and QA) expiration dates through July 31, 2020.
This will provide the regulated community an additional 60 days to obtain the continuing education required to renew.
Please check the Pest Management Division Website (https://opm.azda.gov/) on a regular basis for updates.

Please understand this extension is a temporary measure for those Applicators whose certification(s) would normally expire May 31, 2020. Once renewed, Applicator expiration dates will revert back to the standard May 31st date.
This extension **DOES NOT**apply to Business License or Branch Office Registration renewals as neither require CE to renew.

Please understand this extension is a temporary measure for those Applicators whose certification(s) would normally expire May 31, 2020. Once renewed, Applicator expiration dates will revert back to the standard May 31st date.

PLEASE NOTE - All Pest Management Division (PMD) hosted continuing education (CE) courses have been CANCELLED.

We encourage you to contact other CE providers including those provided by any pest control associations you may be a member of, pest control chemical suppliers, examination training providers, and especially those who provide CE online.

PMD-APPROVED ONLINE CE COURSES MAKE IT POSSIBLE FOR YOU TO OBTAIN CE FROM THE COMFORT AND SAFETY OF YOUR HOME OR OFFICE.

Please visit https://agriculture.az.gov/applyrenew/continuing-education-units to search for CE providers.
