Confidential Data Access Protocol

This paper utilizes a 6-digit NAICS industry-year panel dataset derived from Statistics Canada business microdata (i.e., the Annual Survey of Manufactures Longitudinal Microdata file, the Trucking Commodity Origin-Destination Survey), and confidential supply-use tables, among other sources, as described in the main text and the on-line appendix. Due to level of industry detail, the panel dataset contains confidential observations that cannot be released to the public.

The panel dataset, as well as the business microdata files from which it is derived, **can be access through Statistics Canada's Centre for Data Development and Economic Research (CDER)**. CDER's mandate is to provide researchers with access to business and economic microdata for analytical research. Guidelines for accessing these data are described here: http://www.statcan.gc.ca/eng/cder/index. Further information on data access can be obtained through statcan.cder-cdre.statcan@canada.ca or the CDER Administrator at 613-951-3936.
