R4S ECP Malawi | Semi-structured Codebook for Program Manager and Providers

Codes	Definition/Description	Sub-codes	Definition/Description
District	District this interview took place	Mchinji	Respondent was interviewed in Mchinji district
		Phalombe	Respondent was interviewed in Phalombe district
Delivered ECP_6mo	Respondent has delivered ECP to at least 1 client on the past 6 months.	Yes	Yes, respondent has delivered ECPs to at least 1 client in the past 6 months.
		No	No, respondent has not delivered ECPs to at least 1 client in the past 6 months
FP program deliver ECPs_3mo	Respondents is involved in at least 1 FP program that delivered ECP services in the last 3 months	Yes	Yes, respondent is involved in at least 1 FP program that delivered ECP services in the last 3 months
		No	No, respondent is not involved in at least 1 FP program that delivered ECP services in the last 3 months
		No response	Respondent gave no response to this question
Program or channel	The type of program respondent is involved in that deliver ECPs	Youth outreach	Respondent is involved in youth outreach related program/channel delivering ECPs
		General population outreach	Respondent is involved in general population outreach related program/channel delivering ECP services
		Youth clubs	Respondent is involved in youth club related program/channel delivering ECP services
		CBDAs	Respondent is involved in CBDA related program/channel delivering ECP services
		Community/provider home	Respondent is involved in community based ECP service delivery
		Counseling	Respondent is involved in counseling for ECPs
		Facility	Respondent is involved in facility based ECP service delivery

		HSAs	Respondent is involved in HAS related program/services delivering ECP services
		Outreach_general	Respondent is involved in ECP outreach in the general population
		Outreach_mobile	Respondent is involved in ECP mobile outreach
		Outreach_youth	Respondent is involved in youth outreach for ECPs
		People's home	Respondent is involved in home based delivery of ECPs
		Other	Respondent is involved in other program/services delivering ECP services.
Use_male clients	Respondents' thoughts on how male clients are using ECPs	Agreement with partner	Respondent feels male clients are obtaining ECPs in agreement with partner
		Ask from sexual partner	Respondent feels male clients are obtaining ECPs since they're being asked by their sexual partners (& why)
		Don't know how to use condoms	Respondent feels male clients are obtaining ECPs since they don't know how to use condoms
		Easy to approach a male provider	Respondent feels male clients are obtaining ECPs from this outlet because it's easier for them to approach a male partner
		Easy to use	Respondent feels male clients are obtaining ECPs because they're easy to use
		Failed method	Respondent feels male clients are obtaining ECPs due to a failed method
		Future use	Respondent feels clients are obtaining ECPs in anticipation of future use
		Immediate use	Respondent feels male clients are obtaining ECPs for immediate use
		Multiple partners	Respondent feels male clients are obtaining ECPs because they have multiple partners

		Not ready to start a family	Respondent feels male clients are obtaining ECPs because they are not ready to start a family
		Partner not following FP method	Respondent feels male clients are obtaining ECPs because their partner is not following an FP method
		Peer pressure	Respondent feels male clients are obtaining ECPs due to peer pressure
		Preferred method	Respondent feels male clients are obtaining ECPs because this is their preferred method
		To give to partner	Respondent feels male clients are obtaining ECPs to give to their partner
		Unprotected sex/prevent pregnancy	Respondent feels male clients are using ECP in response to unprotected sex (within the past 5 days)
		Don't know/not sure	Respondent doesn't know and is not sure why male clients are obtaining ECPs
Use_female clients	Respondents' thoughts on how female clients are using ECPs	Distrust partners	Respondent feels female clients are obtaining ECPs because they distrust their partners
		Easy to use	Respondent feels female clients are obtaining ECPs because it's easy to use
		Experiment	Respondent feels female clients are obtaining ECPs to experiment
		Forced sex/forced unprotected sex	Respondent feels female clients are obtaining ECPs because they were forced into having sex or unprotected sex
		Future use	Respondent feels female clients are obtaining ECP in anticipation for future use
		Immediate use	Respondent feels female clients are obtaining ECPs for immediate use
		Misconceptions about other FP methods	Respondent feels female clients are obtaining ECPs because they have misconceptions about other FP methods

		Missed regular FP method		Respondent feels female clients are obtaining ECPs because they missed their regular FP method
		Multiple partners		Respondent feels female clients are obtaining ECPs because they have multiple partners
		Partner asks		Respondent feel female clients are obtaining ECPs because partner asks
		Preferred method		Respondent feels female clients are obtaining ECPs because it's their preferred method
		To prevent diseases		Respondent feels female clients are obtaining ECPs to prevent diseases
		Unprotected sex		Respondent feels female clients are using ECPs in response to unprotected sex (within the past 5 days)
Relationship and living status	Relationship status of most ECP clients and if they live with their husband/wife/partner.	Married	Living together	Respondents feels most clients are married and live together.
			Not living together	Respondent feels most clients are married but not living together
			Away from spouse often	Respondent feels most clients are married but are away from their spouse often
		Unmarried_relationship	Living together	Respondent feels most clients are not married but in a relationship and live together
			Not living together	Respondent feels most clients are not married but, in a relationship, and are not living together
			Away from partner	Respondent feels most clients are not married but in a relationship but live away from partner
		Unmarried_mixed	Living together	Respondent thinks most clients are not married (with different relationship status) and living together
			Not living together	Respondent thinks most clients are not married (with different

				relationship status) and not living together
			Away from partner	Respondent thinks most clients are not married (with different relationship status) and away from their partner
		Don't know/not sure	Living together	Respondent doesn't know or is not sure if most clients are married or not but most are living together
			Not living together	Respondent doesn't know or is not sure if most clients are married or not but most are living together
Age of client	Respondents' thoughts on the typical age of ECP clients	Young adolescents (14 and below)		Respondent thinks typical ECP clients are young adolescents (14 and below)
		Adolescent (15-17)		Respondents thinks the typical age of ECP clients is between 15-17 years of age (adolescent)
		Adult (18-24)		Respondents thinks the typical age of ECP clients is between 18-24 years of age (adult)
		Adults (25+)		Respondents thinks the typical age of ECP clients is 25+ years of age
		Both (adolescents & adults)		Respondent thinks the typical age of ECP client includes both adolescents and adults
Age groups by channel	Respondents' thoughts on if certain age groups seek ECP from certain sources/channels.	Adolescents	Outreach_youth	Respondent thinks adolescents mostly seek ECP services from youth outreach
			Outreach_general pop	Respondent thinks adolescents mostly seek ECP services from outreach for the general population
			HSA	Respondent thinks adolescents mostly seek ECP services from HSAs
			CBDA	Respondent thinks adolescents mostly seek ECP services from CBDAs

			Youth club	Respondent thinks adolescents mostly seek ECP services from youth clubs
			Other	Respondent thinks adolescents mostly seek services from other sources
		Young adults 18-24	Outreach_youth	Respondent thinks young adults mostly seek ECP services from youth outreach.
			Outreach_general pop	Respondent thinks young adults mostly seek ECP services from outreach for the general population
			HSA	Respondent thinks young adults mostly seek ECP services from HSAs
			CBDA	Respondent thinks young adults mostly seek ECP services from CBDAs
			YCBDA	Respondent thinks young adults mostly seek ECP services from YCBDA
			Youth club	Respondent thinks young adults mostly seek ECP services from youth clubs
			Facility/ clinic	Respondent thinks young adults mostly seek ECP services from facility/clinic
			Least accessed channels	What respondent thinks are the least accessed channels by young adults
			Meet on roads/ways	Respondent thinks young adults mostly seek ECP services from roads/ways
			Homes	Respondent thinks young adults mostly seek ECP services from homes
			Pharmacy	Respondent thinks young adults mostly seek ECP services from pharmacies
			Other	Respondent thinks young adults mostly seek ECP services from other sources

		Adults 25+	Outreach_general pop	Respondent thinks adults mostly seek ECP services from outreach for the general population
			HSA	Respondent thinks adults mostly seek ECP services from HSAs
			CBDA	Respondent thinks adults mostly seek ECP services from CBDAs
			Youth club	Respondent thinks adult mostly seek ECP services from youth club
			Health facility	Respondent thinks adults mostly seek ECP services from a health facility
			Other	Respondent thinks adults mostly seek ECP services from other sources
		Both	CBDA	Respondent thinks both adolescents and adults mostly seek ECP services from a CBDA
			HSA	Respondent thinks both adolescents and adults mostly seek ECP services from a HAS
			Health center	Respondent thinks both adolescents and adults mostly seek ECP services from a health center
			Hospital	Respondent thinks both adolescents and adults mostly seek ECP services from hospitals
			Other	Respondent thinks both adolescents and adults mostly seek ECP services from other outlets
			Outreach_general pop	Respondent thinks both adolescents and adults mostly seek ECP services from outreach for the general population
			Outreach_youth	Respondent thinks both adolescents and adults mostly seek ECP services from outreach for youth
			Youth club	Respondent thinks both adolescents and adults mostly

			seek ECP services from youth club
Reaching youth	What respondent's organization does especially to reach and or accommodate young people's access to ECP services	Campaigns/ demand creation	To accommodate youth, respondent's organization is involved in campaigns/demand creation for ECPs
		Community sensitization	To accommodate youth, respondent's organization is involved in community sensitization for ECPs
		Outreach (community, door-to-door, peer-to-peer)	To accommodate youth, respondent's organization is involved in outreach (community, door-to-door, peer-to-peer) for ECPs
		Referrals	To accommodate youth, respondent's organization is involved in handling referrals for ECPs
		School or near school	To accommodate youth, respondent's organization is involved in ECP services at or near schools
		Youth activities/gatherings	To accommodate youth, respondent's organization is involved in youth activities/gatherings distributing ECPs
		Youth clubs	To accommodate youth, respondent's organization is involved in youth clubs proving ECP services
		Youth friendly programs and services	To accommodate youth, respondent's organization is involved in youth friendly programs/services providing ECPs
		None	To accommodate youth, respondent's organization is not involved in ECP services
Feel_youth using ECPs	How respondent feel about youth using ECPs	Favorable	Respondent feels favorable about using ECPs
		Unfavorable	Respondent feels unfavorable about using ECPs
Coercion	If respondent thinks that women were	Yes	Yes, respondent thinks that women are coerced into taking ECPs

	coerced into taking ECPs	No	No, the respondent doesn't think that women are coerced into taking ECPs
		Maybe	Respondent thinks that women are maybe coerced into taking ECPs

For ECP Providers & Providers' Supervisors/trainers only

Codes	Definition/Description	Sub-codes		Definition/Description
Provision of ECP service	Description of how providers provide ECP services or how supervisor instructs providers to provide ECP services in the workplace	How provide ECPs	Assess needs/eligibility	Provider assesses needs/eligibility of client when providing ECP services
			Efficacy	Provider explains efficacy of ECPs when providing services
			Format	Provider mentioned the format in which the provide ECP services
			General counseling	Provider providing general counseling for ECP services
			Instructions	Provider shares instruction for ECP use
			Other FP	Provider also provides information on other FP during ECP services
			Prior information/messaging	Provider provides information on and messaging for ECP services
			Provide ECPs	Provider provides ECPs products
			STIs	Provider provides information on STIs during ECP services
			Schedule	Provider schedules a time to meet with the client for ECP services
			Welcome	Provider usually welcomes and greets the client before ECP services
			Where to get ECPs	Provider share information on where to get ECPs
			Youth outreach/youth corner	Respondent providers ECP services at youth outreach and youth corner
			Varies	The way provider provides EC services varies
		How instruct providers to provide ECPs	Counseling	Respondent instructs providers to provide counseling
			How to use ECPs	Respondent instructs providers to share how to use ECPs

			Other FP products	Respondent instructs providers to share information on other FP products
		How others provide ECPs	Different from myself	Respondent feels others provide ECP services in a different way than they do
			Same as myself	Respondent feels others provide ECP services in the same way as they do
			Outreaches	Respondent feels other provide ECP outreach services
			Don't know	Respondent doesn't know how other providers provide ECP services
Who should receive ECPs	Who respondent feels should receive ECPs	Age	Adults (>18 years)	Respondent feels like adults (>18 years) should receive ECPs
			Anyone_reproductive age	Respondent feels like anyone of reproductive age should receive ECPs
			Teenagers (14-19 years)	Respondent feels like teenagers (14-19 years) should receive ECPs
			Youth	Respondent feels like youth should receive ECPs
		Circumstances	72 hours haven't passed	Respondent feels like clients should receive ECP if 72 hours haven't passed
			Married (women or men)	Respondent feels like clients should receive ECP if they are married (women or men)
			Raped	Respondent feels like clients should receive ECP if they were raped
			Raptured condom	Respondent feels like clients should receive ECP if they raptured a condom
			Sexually active	Respondent feels like clients should receive ECP if they are sexually active
			Unprotected sex	Respondent feels like clients should receive ECP if they had unprotected sex
		Sex	Female	Respondent feels like females should receive ECPs

			Male	Respondent feels like males should receive ECPs
		Other	Disability	Respondent feels like those with a disability should receive ECPs
			Even HIV+	Respondent feels like those who are even HIV+ should receive ECPs
Circumstances ECPs should be discussed	Respondents' thoughts on under which circumstances ECPs should be discussed	Circumstances	After unprotected sex	Respondent thinks ECP should be discussed after unprotected sex
			All circumstances	Respondent thinks ECP should be discussed in all circumstances
			Before unprotected sex	Respondent thinks ECP should be discussed before unprotected sex
			Come in other FP/looking for FP	Respondent thinks ECP should be discussed if clients come in looking for FP/other FP
			Even if using condoms	Respondent thinks ECP should be discussed even if they are using condoms
			Failed or expired FP method	Respondent thinks ECP should be discussed if the client's method failed or expired
			If client asks	Respondent thinks ECP should be discussed if client asks
			Other methods are scarce	Respondent thinks ECP should be discussed if other methods are scarce
			Rape	Respondent thinks ECP should be discussed if the client was raped
		Setting	Clinic (FP, antenatal or general clinic)	Respondent thinks ECP should be discussed at clinics (FP, antenatal or general clinic)
			Community	Respondent thinks ECP should be discussed in the community
			Events/gathering	Respondent thinks ECP should be discussed at events/gatherings

			Group counseling/education	Respondent thinks ECP should be discussed at in group counseling/education
			One-on-one meeting	Respondent thinks ECP should be discussed at one-on-one meetings with clients
			School	Respondent thinks ECP should be discussed at school
			Sensitization	Respondent thinks ECP should be discussed during sensitization campaigns
			Youth friendly programs/services	Respondent thinks ECP should be discussed at youth friendly programs/services
		Who	Pre-sexual debut	Respondent thinks ECPs should be discussed with those in pre-sexual debut
			To all people of reproductive age	Respondent thinks ECPs should be discussed with all people of reproductive age
			Women or young women	Respondent thinks ECPs should be discussed with women or young women
			Young mothers	Respondent thinks ECPs should be discussed with young mothers
			Youth in general	Respondent thinks ECPs should be discussed with youth in general
		Varies	By age	Respondent feels the right circumstance to discuss ECPs varies by age
			By sex	Respondent feels the right circumstance to discuss ECPs varies by sex (male vs female)
			Current FP user	Respondent feels the right circumstance to discuss ECPs varies if the client is a current FP user
			Marital status	Respondent feels the right circumstance to discuss ECPs varies if the client is married or not
			Sexually active	Respondent feels the right circumstance to discuss ECPs

				varies if the client is sexually active or not
			Timing	Respondent feels the right circumstance to discuss ECPs varies on timing
			Tubal ligation	Respondent feels the right circumstance to discuss ECPs varies if the client has tubal ligation or not
			No	Respondent doesn't feel the right circumstance to discuss ECPs varies
Clients' experience with FP	Respondents' understanding about ECP clients' previous experience with FP	Positive		ECP clients previously have had positive experiences with FP
		Negative		ECP clients previously have had negative experiences with FP
		Neutral		ECP clients previously had have neutral experiences with FP
		Mixed		ECP clients previous had mixed experiences with FP
		Previous experience	Depends on age	Respondent thinks client's previous experience with FP depends on their age
			Yes	Respondent thinks their clients previously had experiences with FP
			Mixed	Respondent thinks client's previous experience with FP is mixed
			No	Respondent doesn't think their clients previously had experiences with FP
			Little to one	Respondent thinks client's previous experience with FP depends on
		Methods	ECPs	Respondent's clients had previous experiences with ECPs
			Long term	Respondent's clients had previous experiences with long-term FP products
			Other short term	Respondent's clients had previous experiences with other short-acting products

			Other unspecified FP method	Respondent's clients had previous experiences with other FP methods (unspecified)
Screening	How clients are screened for eligibility to receive ECPs	Inclusion criteria		Inclusion criteria for clients to receive ECPs
		Exclusion criteria		Exclusion criteria that might exclude clients from getting ECPs)
		Doesn't know/forgot how to screen		Respondent doesn't know how to or forgot how to screen
		Common reasons clients are not able to receive ECPs	Age	Clients are not able to get ECPs due to age
			Brest inflammation	Clients are not able to get ECPs due to breast inflammation
			Epileptic	Clients are not able to get ECPs due to being epileptic
			Haven't see doctor yet	Clients are not able to get ECPs if they haven't seen a doctor before
			Headache	Clients are not able to get ECPs if they suffer from headaches
			Lack client knowledge	Clients are not able to get ECPs if they are not already knowledgeable about ECPs
			Lack of ECP service/products	Clients are not able to get ECPs due to lack of services or products
			Long term use	Clients are not able to get ECPs due to long term use
			Not sexually active	Clients are not able to get ECPs if they are not sexually active
			On other FP methods	Clients are not able to get ECPs if they are on other FP methods
			Partner is away	Clients are not able to get ECPs if their partner is away
			Pregnant	Clients are not able to get ECPs if they are pregnant
			Prostitute	Clients are not able to get ECPs if they are a prostitute
			Provider imposed	Clients who come drunk, frequently, forgets

			Provider limited capacity/knowledge	Clients are not able to get ECPs due to some providers having limited capacity or knowledge about ECPs
			Shy	Clients are not able to get ECPs if they are too shy
			Time elapsed	Clients are not able to get ECPs if the window of time to take ECPs have passed
			Distance to a provider	Clients are not able to get ECPs due to long distance to provider
			Limited or lack of supply	Clients are not able to get ECPs due to limited or lack of supply
			Male partner oppose	Clients are not able to get ECPs due to male partner opposing
Info provided about ECPs	What respondent tells client about ECPs/information respondent provides to client about ECPs	Advantages/benefits		Respondent provides information on advantages/benefits of ECPs
		Availability		Respondent provides information on availability of ECPs
		Circumstances ECPs can be taken		Respondent provides information on circumstances ECPs can be taken
		Disadvantages		Respondent provides information on disadvantages of ECPs
		Dosage		Respondent provides information on ECP dosage
		Effectiveness		Respondent provides information on effectiveness of ECPs
		Frequency of use		Respondent provides information on frequency of ECP use
		How ECP works		Respondent provides information on how ECP works
		How to take ECPs		Respondent provides information on how to take ECPs

		No STI prevention	Respondent provides information on how STI doesn't have STI prevention
		Other FP options	Respondent provides information on other FP method options
		Side effects	Respondent provides information on side effects of ECPs
		What ECPs are	Respondent provides information on what ECPs are
		Unspecified	Respondent didn't specify what type of information they provide
Info provided about ECPs_variation	If the information respondent provides varies by client	Varies by age	Information respondent provides on ECPs varies by clients' age
		Varies by gender	Information respondent provides on ECPs varies by clients' gender
		Varies by reproductive goal	Information respondent provides on ECPs varies by client's reproductive goal
		Varies if current /previous FP user	Information respondent provides on ECPs varies if client is current/previous FP user
		Varies if sexually active	Information respondent provides on ECPs varies if client is sexually active
		No variation	Information respondent provides on ECPs does not vary
Other FP methods	The types of ECP client that respondent councils on other FP methods	All	Respondent councils ECP client on all other FP products
		Condoms	Respondent councils ECP client on condoms
		Unspecified methods	Respondent didn't specify the type of FP methods that they council on
Other FP methods & services_client type		Adults	Respondent provides other FP method services to adults
		All	Respondent provides other FP method services to all types of people

		Married women	Respondent provides other FP method services to married women
		Only need ECPs occasionally	Respondent provides other FP method services to people who only need ECPs occasionally
		Peers	Respondent provides other FP method services to peers
		Risky clients	Respondent provides other FP method services to risky clients
		Students	Respondent provides other FP method services to students
		Women_childbearing age	Respondent provides other FP method services to women of childbearing age
		Young adult women	Respondent provides other FP method services to young adult women
		Youth/teenagers	Respondent provides other FP method services to youth/teenagers
Responsive to other FP methods	If clients are responsive to being counseled on other methods	Yes	Clients are responsive to being counseled on other methods
		No	Clients are not responsive to being counseled on other methods
		Some	Some clients are responsive to being counseled on other methods
Information to male clients	What different type of information or additional information respondent gives to male clients who are obtaining ECPs themselves	Avoid unprotected sex	Respondent provides information on how to avoid unprotected sex to male clients
		Counseling	Respondent provides information on counseling to male clients
		ECP dosing	Respondent provides information on ECP dosing to male clients
		HIV/AIDS & STIs	Respondent provides information on HIV/AIDS protection to male clients

		Has not provided information to males		Respondent has not provided information to male clients
		How ECP works		Respondent provides information on how ECP works to male clients
		How women can use ECPs		Respondent provides information on how women can use ECPs
		Other methods		Respondent provides information on other FP methods to male clients
		Same information as female clients		Respondent provides the same information to both male and female clients
Typical ECP use	How clients are typically using ECPs	Use right away	Expired regular method	Clients typically use ECP right away because their regular method expired
			Rape	Clients typically use ECP right away due to rape
			Skipped other FP method	Clients typically use ECP right away because they skipped other FP method
			Unprotected sex	Clients typically use ECP right away due to unprotected sex
		Have on hand		Clients are typically obtaining ECPs to have on-hand before they need it
		Mixed, use before or after		Clients are obtaining ECPs both for use before and after sex
		Other		Clients are typically obtaining ECPs for other reasons
Client frequency	How often same clients come back to obtain ECPs	Frequently		The same ECP clients frequently come back for ECPs
		Depends/varies		Frequencies in which the same client comes back to obtain ECP depends/varies
		Infrequently		The same ECP clients infrequently come back for ECPs
		Can't tell/seen few clients		Respondent can't tell how often the same client comes back to obtain ECP services/they've only seen a few clients

Feel Use > 1x in same month	How respondent feels about clients using ECPs >1x in the same month	Favorable		Respondent feels favorable about client using ECPs >1x in the same month (& who respondent feels this way)
		Unfavorable	At risk of unplanned pregnancy	Respondents feel unfavorable about client using ECPs >1x in the same month because it puts them at risk of pregnancy
			Has side-effects (w/ frequent use)	Respondents feel unfavorable about client using ECPs >1x in the same month because of the belief that ECP have side effects w/ frequent use
			Reckless	Respondents feel unfavorable about client using ECPs >1x in the same month because they feel like it's reckless
			Should be used for emergency	Respondents feel unfavorable about client using ECPs >1x in the same month because they believe ECPs should only be used for emergency
			Should be using other/longer term FP	Respondents feel unfavorable about client using ECPs >1x in the same month because they believe that clients should be using other/longer term FP
			Stock is scarce	Respondent feel unfavorable about client using ECPs >1x in the same month because stock is scarce
		Indifferent		Respondent feels indifferent about client using ECPs >1x in the same month (& who respondent feels this way)
		Not common		Respondent believes it's not common to for clients to be using ECPs >1x a month
		Don't know		Respondent doesn't know how they feel about clients using ECPs >1x a month

Feel_female clients	How respondent feels about female clients using ECPs	Favorable		Respondent feels favorable about female clients using ECPs
		Unfavorable		Respondent feels unfavorable about female clients using ECPs
Use as regular FP method	How respondent feels about clients using ECPs as regular FP method	Favorable		Respondent feels favorable about client using ECPs as regular FP method
		Unfavorable		Respondent feels unfavorable about client using ECPs as regular FP method
		Mixed		Respondent has mixed feeling about client using ECPs as regular FP method
		Indifferent		Respondent feels indifferent about client using ECPs as regular FP method
Packs provided (doses)	How many packs (or doses) respondent typically provides to clients	1 pack		Respondent typically provides 1 pack of ECPs to client
		2 packs		Respondent typically provides 2 packs of ECPs to clients
		3 packs		Respondent typically provides 3 packs of ECPs to client
		4 packs		Respondent typically provides 4 packs of ECPs to client
		>=5 packs		Respondent typically provides >=5 packs of ECPs to clients
		However they want		Respondent provides however many packs clients want
		Varies	Availability	Number of packs & doses respondent provides to clients varies by availability
			Boarding school students	Number of packs & doses respondent provides to clients varies by if client is in boarding school
			By age	Number of packs & doses respondent provides to

				clients varies by age of client (& how)
			By frequency of sexual activity	Number of packs & doses respondent provides to clients varies by frequency of client's sexual activity
			By sex	Number of packs & doses respondent provides to clients varies by sex of client (& how)
			Distance traveled	Number of packs & doses respondent provides to clients varies by the distance the client traveled
			Husband away	Number of packs & doses respondent provides to clients varies if the client's husband is away
			If current FP user	Number of packs & doses respondent provides to clients varies if client is current FP user (& how)
			If previous ECP user	Number of packs & doses respondent provides to clients varies if client is a previous ECP user (& how)
			If using ECP as main FP method	Number of packs & doses respondent provides to clients varies if client is using ECPs as their main FP method
			No	Number of packs & doses respondent provides to clients doesn't vary
Requested packs (doses)	How many packs (or doses) of ECPs clients tend to request	1 pack		Clients typically request 1 pack of ECPs
		2 packs		Clients typically request 2 packs of ECPs
		3 packs		Clients typically request 3 packs of ECPs
		4 packs		Clients typically request 4 packs of ECPs
		>=5 packs		Clients typically request >=5 packs of ECPs
		Unspecified		Respondent didn't share how many packs clients request

		Don't ask		Respondent stated that clients don't request the number of packs
		Don't know		Respondent doesn't know the number of packs that the client requests
		Varies	By age	Number of packs and doses clients tend to request varies by age
			By sex	Number of packs and doses clients tend to request varies by sex
			If previous ECP user	Number of packs and doses clients tend to request varies if previous ECP user
			If using ECP as main FP method	Number of packs and doses clients tend to request varies if the client is using ECPs as their main FP method
			Meanwhile as they decide on a method	Number of packs and doses clients tend to request varies if they are deciding on another method
			Sexual activity	Number of packs and doses clients tend to request varies based on sexual activity
			No	Number of packs and doses clients tend to request doesn't vary
Payment for ECP services	How much clients pay for ECP services	Indirect cost		How much clients pays for indirect cost
		No fees		Client pays no fees
Hours	The time period that respondent thinks women should take ECPs	72 hours		Respondent thinks ECP should be taken within a 72-hour window of having sex
		120 hours		Respondent thinks ECP should be taken within a 120-hour window of having sex

All program staff

Codes	Definition/Description	Sub-codes	Definition/Description
National ECP strategy	If program staffs have heard of the national ECP strategy	Yes	Program staff have heard of national ECP strategy before this study
		Not sure	Program staff is not sure if they heard of national ECP strategy before this study
		No	Program staff have not heard of national ECP strategy before this study
What_know ECP strategy	What program staff knows about the national EC strategy prior to the study [among program staff who said yes that they were aware of the national EC strategy]	Channel	Program staff knows which channels can distribute ECPs
		Community distribution	Program staff knows that the strategy promotes community distribution of ECPs
		Eligibility	Program staff knows the strategy states eligibility for ECP services
		Encourage ECP distribution	Program staff knows that the strategy encourages ECP distribution
		For non-emergency	Program staff knows that the strategy promotes non-emergency distribution of ECPs
		Implementation procedure	Program staff knows the strategy states the implementation procedure for ECPs
		Over the counter	Program staff knows the strategy promotes over the counter distribution of ECPs
		Prevent pregnancy	Program staff knows that ECPs are used to prevent pregnancy
		Reach	Program staff knows the strategy discusses reading people with ECPs
How_learn ECP strategy	How program staff learned about national EC strategy [among program staff who said yes that they were aware	PSI	Program staff learned about the national EC strategy through PSI
		Radio	Program staff learned about the national EC strategy through the radio

	of the national ECP strategy]	Review meeting		Program staff learned about the national EC strategy through review meeting
		Training		Program staff learned about the national EC strategy through trainings
Activities participated	Activities provider has participated in related to ECP strategy	Awareness		Respondent has/is involved in raising awareness about the ECP strategy
		Distribution		Respondent has/is involved in the distribution of ECPs
		Service delivery		Respondent is involved in service delivery of ECPs
		Training		Respondent is involved in training for ECP service delivery
		No		Respondent is not involved in ECP service delivery
Change in type client	Thoughts on if national strategy influenced changes in type of client seeking EC services	Yes		Feel that EC strategy influenced change in type of client seeking ECP services, and if so, how?
		No		Don't feel that EC strategy influenced change in type of client seeking ECP services, and why not?
Change in service provision	Thoughts on if EC strategy influenced changes in how ECP services are provided	Yes		Feel EC strategy influenced change in how ECP services are provided, and if so, how?
		None		Don't feel EC strategy influenced change in how ECP services are provided, and why not?
Going well	What is working well with regards to ECP services and why	Client experiences	Easy to take	Respondent cited ease of taking ECPs was what's working well for clients
			No/little side effects	Respondent cited no/little side effects as what's working well for clients
			OTC/someone else can obtain for you	Respondent cited ECPs being OTC was what's working well
			Satisfaction with efficacy	Respondent cited client's satisfaction w/efficacy as what's working well

			Service	Respondent cited ECP services as what's working well
		Impact	Less unplanned pregnancy	Respondent cited less unplanned pregnancy as what's working well
			School continuation	Respondent cited more girls continuing school as what's working well
		Knowledge	Awareness	Respondent cited high awareness about ECPs as what's working well
			High demand	Respondent cited high demand for ECPs as what's working well
		Other	Stakeholder involvement	Respondent cited stakeholder involvement as what's working well
			Supervision	Respondent cited supervision as what's working well
			Supply	Respondent cited supply as what's working well
Supply	Thoughts on the supply of ECPs and if its keeping up with the demand	Yes		ECP supply is keeping up with demand
		No		ECP supply is not keeping up with demand
		Fluctuates		ECP supply fluctuates
Awareness campaigns	Knowledge of ECP awareness campaigns	Yes		Yes, there have been ECP awareness campaigns
		No		No, there have not been ECP awareness campaigns
		Not sure		Not sure about ECP awareness campaigns
Knowledge_ where to get ECPs	Thoughts on if people know where to get ECPs	Yes		Yes, people know where to get ECPs
		Few		Few people would know where to get ECPs
		No		No, people don't know where to get ECPs
Improve services	Thoughts on if national EC strategy helped improve ECP services	Yes		Yes, national EC strategy helped improve ECP services, and how?
		No		No, national EC strategy didn't help improve ECP services, and why not?
		Not sure / don't know		Not sure/don't know if national EC strategy helped improve ECP services

ECP services	How ECP services are working for all people who might want or need ECPs	Well		ECP services are working well for all people who might want or need ECPs
		Not well		ECP services are not working well for all people who might want or need ECPs
		Mixed		ECP services are working well for some but not others who might want or need ECPs
		Not sure		Not sure if ECP services are working well for all people who might want or need ECPs
		Who_ left out	Women	Respondent thinks women are being left out of ECP services
			Youth	Respondent thinks youth are being left out of ECP services
			None	Respondent thinks there are no people being left out of ECP services
		Improvement		Things that should be done to improve ECP services
Youth experience	Thoughts on young people's experience with ECP services	Positive		Feel young people's experience with ECP services is positive
		Mixed		Feel young people's experience with ECP services are mixed
		Negative	Distance	Feel young people's experience with ECPs are negative due to traveling long distances
			In stock but not given	Feel young people's experience with ECPs are negative because ECPs are in stock but not given/distributed
			Judged	Feel young people's experience with ECPs are negative due feeling judged
			Supply	Feel young people's experience with ECPs are negative due to limited supply of ECPs
Community feel	Thoughts on how the community feels about ECPs	Generally supportive	Advocating for stock	Community is generally supportive and also advocates for stocks of ECPs
			Church	Community is generally supportive, including churches
			Community leaders/village heads	Community is generally supportive, including community leaders/village heads

			Ease of use	Community is generally supportive due to ease of use of ECPs
			General members	General members of the community are supportive
			Less abortions/unplanned pregnancy	Community is generally supportive since it's helped prevent abortions/unplanned pregnancy
			Mother groups	Community is generally supportive including mother groups
			Parents	Community is generally supportive including parents
			Preferred for youth over OCPs	Community is generally supportive since it's preferred for/by youth over ECPs
			Sharing information	Community is generally supportive by sharing information
			Women	Community is generally supportive, including women
			Youth clubs	Community is generally supportive of youth clubs
		Generally unsupportive		Community is generally unsupportive
		Varies	Age	Feel community's support varies/depends on age
			Sex	Feel community's support varies/depends on sex
			Current FP user	Feel community's support varies/depends on if client is a current FP user
			Previous ECP user	Feel community's support varies/depends on if clients are previous ECP user
			If not using a longer-term FP method	Feel community's support varies/depends on if clients are not using longer term FP
			Misconceptions	Feel community's support varies/depends on if they have misconceptions about ECPs
			Parents	Feel community's support varies/depends on if they are parents
			Religion	Feel community's support varies/depends on religion

			Stock	Feel community's support varies/depends on stock of ECPs available
			No	Doesn't feel community's support varies
		Don't know/lack knowledge		Respondent doesn't know how community fees about ECPs
		Improve community suppose	Awareness	Community support for ECPs could be improved through awareness building
			Involved key stakeholders	Community support for ECPs could be improved through involving key stakeholders
			Outreaches	Community support for ECPs could be improved through outreaches
			Reach men	Community support for ECPs could be improved through reaching more men
			Supply	Community support for ECPs could be improved through better supply
Challenges	Thoughts on challenges to providing ECP services and thoughts on addressing them	Client	Distance to provider	Distance to provider is a client level challenge to obtain ECP services
			False rumors	False rumors is a client level challenge to obtain ECP services
			Husband finding out	Fear of husband finding out is a client level challenge to obtain ECP services
			Information	Lack of information (including lack of trust in information) is a client level challenge to obtain ECP services
			Religion	Religion sensitivities is a client level challenge to obtain ECP services
			Shy youth/feeling judged	Youth feeling shy or judged are client level challenge to obtain ECP services
		Health system	Monitoring	Monitoring is a health system challenge for ECP services
			Supply chain/supply	Supply chain/supply are health system challenges for ECP services

			Too few providers	Having too few providers is a health system challenge for ECP services
		Provider	Providers lack knowledge/training	Provider's lack of knowledge/training is a challenge to ECP services
			Rainy season	The rainy season creates a challenging environment for ECP services
			Service delivery	Quality of service delivery is a challenge for ECP services
			Transport	Transport to hard-to-reach areas challenge for ECP services
		Structural	Demand creation	Demand creation is a challenge for ECP services
			Restrictions	Restrictions for services is a challenge to EC services
		Varies	Age	Challenges to providing ECP services varies by age
			Sex	Challenges to providing ECP services varies by sex
			Current FP user	Challenges to providing ECP services varies if client is a current FP user
			Unspecified	Respondent didn't specify if challenges to providing ECP services varies
			No	Challenges to providing ECP services doesn't vary
		No		Respondent doesn't feel like there are challenges to providing ECP services
Improving ECP services	Thoughts on what is needed to improve ECP services	Health system	Data systems	Better data systems are needed to improve ECP services
			Expansion to additional settings	Expansion to additional settings is needed to improve ECP services
			Guidance	Better guidance are needed to improve ECP services
			Logistics	Better logistics are needed to improve ECP services
			More outlets	More outlets are needed to improve ECP services

			More service providers	More service providers are needed to improve ECP services
			Provided with other FP	Providers with other FP options are needed to improve services
			Quality assurance	Quality assurance exercises are needed to improve ECP services
			Referral system	Better referral systems are needed to improve ECP services
			Supply	Better supply is needed to improve ECP services
		Provider	Collaboration	More supply is needed to improve ECP services
			Counseling	Better counseling are needed to improve ECP services
			Incentives	Provider incentives are needed to improve ECP services
			Prompt services	Prompt services are needed to improve ECP services
			Supervision	Better supervision is needed to improve ECP services
			Training / curriculum / refreshers	Better training/curriculum/ refreshers are needed to improve ECP services
			Transport	Better transport is needed to improve ECP services
		Structural	Awareness/ sensitization	More awareness building is needed to improve ECP services
			Campaigns	More campaigns are needed to improve ECP services
			Equitable reach	Equitable reach is needed to improve ECP services
			Funding	More funding is needed to improve ECP services
		Variative by client	Yes	Respondent thinks ways to improve ECP services varies by client
			No	Respondent doesn't think ways to improve ECP services vary by client
Improving ECP	Thoughts on what is needed to improve	Health systems	Accessibility	Making ECPs accessible would be needed to improve ECP services for youth

services_youth	ECP services for young people		Information/service provision at schools	Information/service provision at schools would be needed to improve ECP services for youth
			Peer training	Peer training would be needed to improve ECP services for youth
			Supervision / review meetings	Supervision/review meetings would be needed to improve ECP services for youth
			Supply	More supply of ECPs would be needed to improve ECP services for youth
			Youth friendly service	Youth friendly service would be needed to improve ECP services for youth
		Providers	Long term methods education	Long term methods education would also be needed
			Provider uniform	Provider unform would be needed to improve ECP services for youth
			Training/refresher training	Training/refresher training would be needed to improve ECP services for youth
		Structural	Awareness	More awareness building would be needed to improve ECP services for youth
System barriers	What other system ideas could facilitate delivery of ECPs	Health system	Data systems	Better data systems could better facilitate delivery of ECPs
			More service providers	More service providers could better facilitate delivery of ECPs
			Proximity of services	More proximal services could better facilitate delivery of ECPs
			Supply/supply chain	Better supply/supply chain could better facilitate delivery of ECPs
			Youth friendly space or days	Youth friendly space or days could better facilitate delivery of ECPs
		Provider	Incentives	Provider incentives could better facilitate delivery of ECPs
			Rainy season	The rainy season has been a challenge for service delivery

			Training	Better training could better facilitate delivery of ECPs
			Transportation	Transportation for providers could better facilitate delivery of ECPs
		Structural	Awareness	More awareness building could better facilitate delivery of ECPs
			National expansion of policy	National expansion of the strategy could better facilitate delivery of ECPs
		None		Respondent can't think of a better way to facilitate delivery of ECPs
