Replication Notes*

November 2021

- The replication package contains three folders:
  - **~/Analysis**: code in Stata and R software and associated log files.
  - **~/Data**: all datasets used for producing tables and figures (summarized in Table 1).
  - **~/Results**: results and outputs produced from the code in the "Analysis" folder.
- To replicate the results in the paper and appendix, run the following files:
  - **~/Analysis/000_masterDo.do**: this file will run all Stata .do files.
  - **~/Analysis/007_analysis_VoxPress.R**: this file conducts structural topic modeling in R.
- To view the resulting figures and tables, compile the following LaTeX file:
  - **~/Results/UZ_Replication_CompiledResults.tex**: this file will update and compile all tables and figures to generate a PDF of replication results.

Name	Description
election_district_panel.dta	state-district-election year panel
votes_wind_panel.dta	state-district-year panel
ACS_panel_balanceTest_recodeVar.dta	American Community Survey panel 2005-2011
votes_wind_panel_CCES.dta	state-district-year panel merged with CCES data
election_district_panel_Texas.dta	state-district-election year panel including Texas
votes_wind_panel_CBP.dta	state-district-year panel merged with CBP data
election_turnout_district_panel.dta	state-district-election year panel including voter turnout by party identification
vox_district_year_cleaned.csv	press release data from vox.gov
election_district_panel_RPS_recodeVar.dta	state-district-election year panel merged with RPS data
votes_wind_panel_RPS_recodeVar.dta	state-district-year panel merged with RPS data
votes_wind_panel_urban.dta	state-district-year panel including urban area percentage
election_district_panel_urban.dta	state-district-election year panel including urban area percentage

Table 1: List of all datasets used in the paper
