Approved by the University of Texas at Tyler Institutional Review Board

Interview Protocol
Instructions

Thank you for volunteering for this study. I am working on a qualitative study that focuses on the integration of artificial intelligence in medical education. I will be asking you a few questions that will take between 15-20 minutes to answer. You were chosen because of your teaching experience and because you agreed to talk about your perceptions of the integration of AI in your clinical teaching duties. All information you share will be kept confidential. Your name will not be disclosed at any time. If you have any questions or need to take a short break, please let me know. Before we begin, I would like your permission to record this Zoom session to make sure I capture all the information you share.

Interview Questions

1. Question 1: Please briefly introduce yourself and tell us about your background.
2. Question 2: What is your working definition of AI in the healthcare and medical education realms?
3. Question 3: Tell me about your experiences with AI in the clinical field and in medical education.
4. Question 4: Have you encountered clinical educators experiencing difficulty with AI use or implementation?
5. Question 5: Is there anything HRD professionals can do to help physicians with the integration of AI skills in their medical education duties?
6. Question 6: Is there a resource that you refer to for the newest and best AI in clinical education?
7. Question 7: Are there any ethical implications to be aware of with AI in medical education?
8. Question 8: Are there any other questions about AI and medical education that you think I should have asked you, but didn't?
