Title of Dataset: Clinical factors in Aminoglycoside-Induced Ototoxicity in Neonates

This file was generated on 2025-09-09 by Katrina Ramsey.

This document provides summary data on the incidence of maternal conditions for patient-level data that cannot be shared due to sensitivity and privacy concerns. Any cell containing between 1 and 10 individuals is suppressed to protect patient confidentiality; a reported value of zero does not violate the minimum cell size policy. Suppressed values are indicated as "<11" in these tables.

Maternal diagnoses

	n / Number of nonmissing values
HSV (herpes simplex virus)	<11 / 301
Varicella (chicken pox)	0 / 301
Rubella (German measles)	0 / 301
CMV (cytomegalovirus)	0 / 301
Toxoplasmosis	0 / 301
Syphilis	0 / 301

Infant race (detailed version not available in repository data)

	Summary
N	309
Infant's race	
Caucasian	219
African American	23
Asian	<11
Native Hawaiian/Pacific Islander	<11
American Indian/Alaska Native	<11
More than one	29
[unknown]	26
