Figure: Histograms showing the sampling distribution of estimates. The top panel ("Strong coordination") shows a distribution centered around 0.15–0.2 with "Common treatment" and "Implemented treatment" vertical lines near each other. The bottom panel ("Weak coordination") shows a distribution centered around 0.35 with "Common treatment" line near 0.15 and "Implemented treatment" line near 0.35. The y-axis shows "Number of estimates" and the x-axis shows "Sampling distribution of estimates".
