```
================================================================================
Project Code: BYUC0016
Project Name: American Family Survey 2018
Prepared for: Jeremy Pope and Chris Karpowitz
Interviews: 3000
Field Period:  August 03, 2018 - August 14, 2018
Project Manager: Sam Luks - 650.462.8009
================================================================================
```

YouGov interviewed 3332 respondents who were then matched down to a sample of 3000 to produce the final dataset. The respondents were matched to a sampling frame on gender, age, race, and education. The frame was constructed by stratified sampling from the full 2016 American Community Survey (ACS) 1-year sample with selection within strata by weighted sampling with replacements (using the person weights on the public use file).

The matched cases were weighted to the sampling frame using propensity scores. The matched cases and the frame were combined and a logistic regression was estimated for inclusion in the frame. The propensity score function included age, gender, race/ethnicity, years of education, and region. The propensity scores were grouped into deciles of the estimated propensity score in the frame and post-stratified according to these deciles.

The weights were then post-stratified on 2016 Presidential vote choice, and a four-way stratification of gender, age (4-categories), race (4-categories), and education (4-categories), to produce the final weight.

```
